The Business of Less Oct 23 2021 The Business of Less rewrites the book on business and the environment. For the last thirty years, corporate sustainability was synonymous with the pursuit of 'eco-efficiency' and 'win-win' opportunities. The notion of 'eco-efficiency' gives us the illusion that we can achieve environmental sustainability without having to question the pursuit of never-ending economic growth. The 'win-win' paradigm is meant to assure us that companies can be protectors of the environment whilst also being profit maximizers. It is abundantly clear that the state of the natural environment has further degraded instead of improved. This book introduces a new paradigm designed to finally reconcile business and the environment. It is called 'net green', which means that in these times of ecological overshoot businesses need to reduce total environmental impact and not just improve the eco-efficiency of their products. The book also introduces and explains the four pollution prevention principles 'again', 'different', 'less', and 'labor, not materials'. Together, 'net green' and the four pollution prevention principles provide a road map, for businesses and for every household, to a world in which human prosperity and a healthy environment are no longer at odds. The Business of Less is full of anecdotes and examples. This brings its material to life and makes the book not only very accessible, but also hugely applicable for everyone who is worried about the fate of our planet and is looking for answers.

A Brain for Business – A Brain for Life Feb 24 2022 Behaviour change is hard, but O'Mara shows that by adopting strategies that are well-founded in the science of brain and behaviour individuals and organisations can adapt to the demands of the modern world. The brain matters in business. The problem is that our brains have many biases, heuristics and predilections that can distort behaviour and decision making. The good news is that we know more about how these work than ever before. O'Mara's starting point is that, as our behaviour arises from the structure and function of our brains, careful examination of a series of brain-based ('neurocognitive') analyses of common aspects of human behaviour relevant to business and management practice reveals lessons that can be used at work. He begins by looking at neuroplasticity and how it enables a shift from a restrictive 'fixed mindset' to an enabling 'growth mindset'. He shows how this changing mindset approach – where the focus is on task and improvements

based on effort – is scalable within organisations. Next, as the brain is a living organ like the heart and lungs, O'Mara shows how to keep it physically in the best possible shape before examining how we exercise control over our behaviour, build resilience and create positive brain states. He also considers the implications for business of our brains wiring for status and illustrates how research shows that it is possible to de-bias assumptions about gender and race – and the impact that this has on performance.

Company of One Aug 09 2020 What if the real key to a richer and more fulfilling career was not to create and scale a new start-up, but rather, to be able to work for yourself, determine your own hours, and become a (highly profitable) and sustainable company of one? Suppose the better--and smarter--solution is simply to remain small? This book explains how to do just that. *Company of One* is a refreshingly new approach centered on staying small and avoiding growth, for any size business. Not as a freelancer who only gets paid on a per piece basis, and not as an entrepreneurial start-up that wants to scale as soon as possible, but as a small business that is deliberately committed to staying that way. By staying small, one can have freedom to pursue more meaningful pleasures in life, and avoid the headaches that result from dealing with employees, long meetings, or worrying about expansion. *Company of One* introduces this unique business strategy and explains how to make it work for you, including how to generate cash flow on an ongoing basis. Paul Jarvis left the corporate world when he realized that working in a high-pressure, high profile world was not his idea of success. Instead, he now works for himself out of his home on a small, lush island off of Vancouver, and lives a much more rewarding and productive life. He no longer has to contend with an environment that constantly demands more productivity, more output, and more growth. In *Company of One*, Jarvis explains how you can find the right pathway to do the same, including planning how to set up your shop, determining your desired revenues, dealing with unexpected crises, keeping your key clients happy, and of course, doing all of this on your own.

The Unique Technique Nov 23 2021 I am an optometrist. I owned a very traditional medical, white coat practice in Pittsburgh, Pennsylvania near the University of Pittsburgh for 10 years. I became bored and uninspired in this vanilla business environment and sterile space. Feeling restless, I sold my practice and began the search for a new place to start a fresh concept in optometry. I found Frederick, Maryland, which is a historic, walkable little city that tops the triangle with DC and Baltimore. I relocated to a new town, in a new state with a brand new practice - Unique Optique. I was an outsider and a transplant, trying to win Frederick's trust and convince the residents of this town to come to my practice to spend money on high-end glasses. To accomplish this feat, I decided that I needed to show our authenticity, exude genuine sincerity, and smile through adversity. I embraced my flaws; I was vulnerable and real. I used social media, in-house events and the decor of the office to display the business's personality. People instantly related to the practice. They saw that I was not perfect, but I was earnest and that I truly cared. I was proud of my venture. Unique Optique's reviews were stellar and real. The practice grew steadily and by the end of the first year, I was recognized as the Start Up Entrepreneur of Frederick County. Soon, I had requests from business owners and entrepreneurs to come and visit the practice and discuss our unique image strategies. People wanted this quality for their own businesses. I realized that I had helpful and valuable information and put my techniques down on paper. While developing my brand and marketing my business, I have made mistakes, learned from them, and attempted to fix them. I have worked through adversity and difficulties. In the end, I cultivated a brand to which people could relate. This is my

experience. I hope it helps you find your Unique Technique."

Anointed for Business Jul 28 2019 Every Business Is God's Business The notion that labor for profit and worship of God are now, and always have been, worlds apart, is patently false. The Early Church founders were mostly community leaders and highly successful businesspeople. The writing of the Gospels was entrusted to Luke, a medical doctor; Matthew, a retired tax collector; Mark, the manager of a family trust; and John, a food supplier. Lydia was "a dealer in purple cloth." Dorcas was a clothes designer. In this expanded version of the bestselling Anointed for Business, Ed Silvano focuses on the heart of our cities, which is the marketplace. Yet the perceived wall between commercial pursuit and service to God continues to be a barrier to advancing His kingdom. Silvano shows Christians how to knock down that wall--and participate in an unparalleled marketplace transformation. Only then can we see God's kingdom invade every corner of our world. Readers will appreciate Silvano's passionate call to men and women in the workplace to rise to their God-appointed positions. The included study guide will

enable the reader to put these revolutionary concepts into action.

Purpose Delivered Nov 11 2020 Going beyond the why and what of purpose-led business, this book sets out an innovative business model of how to lead and operate a company to deliver its purpose. Western capitalism is in crisis due to the growing disconnect between business and society, and there are growing calls for a shift from the primacy of shareholder value to the primacy of purpose. But there is a paucity of codified best practice for how CEOs should go about making this shift. Enter Alan Barlow: a CEO practitioner who demonstrates with analytical rigor and evidence-based argument a business model for how CEOs can actually deliver a purpose-defined company that yields both bigger benefits for society and bigger profits for the business. Current and aspiring business leaders and executives will benefit from not only this new business model but also a fully documented route map for monitoring and reviewing successful impact, and highly focused non-financial and financial metrics for benchmarking. Completing the loop for 'company purpose' means that business can become a force for good for society.
