[Clothing as Material Culture](#) Jun 04 2020 This book puts the material back into clothing. In recent years social scientists have become increasingly interested in theories of fashion, but have rarely directly addressed the material qualities of clothing. By contrast, traditional studies of dress have focused on textiles but often neglect the larger cultural context within which dress becomes consumed as clothing. This book fills a major gap by combining these two 'camps' through an expressly material culture approach to clothing. In

sustained case studies, Kehler and Miller argue that cloth and clothing are living, vibrant parts of culture and the body. From the recycling of cloth in Africa and India and the use of pattern in the Pacific, to the history of 'wash and wear' and why women wear the wrong clothes to restaurants in London, this book shows the considerable advantage gained by seamlessly combining material and social aspects of dress and textiles.

*Education and the Politics of Becoming* Oct 21 2021 This collection examines education in the light of a politics of becoming. It takes a non-hierarchical transdisciplinary approach, challenging the macropolitics of pre-established governmental and economic agendas for education. Drawing on the philosophy of Gilles Deleuze and Felix Guattari, the contributors consider questions such as how education might engage a politics of becoming, and how education and becoming function in a society of control. Since Deleuze and Guattari contend that a society is defined by its becomings, its transformations, this collection asks how education, itself a process in becoming, may contribute "collective creations" to a society in continual flux. The chapters bring theory and praxis together, deploying power, affect, cartography, space, relationality, assemblage and multiple literacies in order to experiment with music, art, language, teacher education, curriculum and policy studies. This collection is an innovative resource, creating an encounter with the macropolitics of education, and altering teaching, learning, evaluation and curriculum. This book was originally published as a special issue of *Discourse: Studies in the Cultural Politics of Education*.

Beyond Ontological Blackness Nov 09 2020 In this study, Victor Anderson traces instances of "ontological blackness" in African American theological, religious and cultural thought, arguing that African American critical thought has been trapped in a racial rhetoric that it did not create and which cannot serve it well. Drawing together 18th- and 19th-century accommodationism and its assimilationist heirs with the movements of Black Power and Afrocentrism, Anderson shows that all exhibit a similar structure of racial identity. He suggests that it is time to move beyond the confines of "the cult of black heroic genius" to what Bell Hooks has termed "postmodern blackness": a racial discourse that leaves room to negotiate African American identities along lines of class, gender, sexuality, and age as well as race.

**Men in the Mirror** Mar 14 2021 In recent decades, the myth of fashionable women and sartorially challenged men has been overturned not least through the proliferation of men's style magazines such as GQ and the emergence of masculinity as a marketing tool. In this engaging book, Edwards applies a sociological approach to our understanding of men's fashion, which he argues is significant in the nexus of masculinity and society, past and present, rather than a narrow artistic or aesthetic interest. Rejecting an essentialist or 'natural' origin, Edwards explores how masculinity and men's fashion are constructed, particularly in relation to consumer society. It is the growing commodification and aestheticism of everyday life, alongside developments in marketing and advertising, that Edwards identifies as the catalyst in the emergence of men's fashion, rather than an abstract 'crisis of masculinity' or 'new man' identity. Concurrently, in the 1980s, changes in demography, economics and ideology gave certain men greater freedom and spending power than ever before. Edwards investigates how these men, clearly distinguished by age, class and sexual orientation, were seduced by advertisers with sexualised images of suited city gents and body-beautiful boys in Levis, and how the resultant process of consumption was facilitated through developments in the practice of shopping itself, such as easy access to credit. He examines the influence of the advertisers' message in creating a hierarchy of masculinity in which some men are valorised and others are denigrated. Starting with a historical review of men's fashion and a discussion of its importance and meanings, Edwards goes on to analyse the contemporary marketing of menswear and masculinity in advertising and in the media, and considers the politics of fashion for men in terms of gender, class, race and sexuality.

Barlaam and Ioasaph Aug 07 2020 There is no doubt that the author of Barlaam and Ioasaph himself regarded his story as a true narrative of the lives of real characters and that this view was universally held until quite recent times. The names of Saint Barlaam and

Saint Ioasaph have figured in the Calendars both of the Roman and of the Greek Church and still retain their place in the latter. To-day, however, this view can be no longer held. A comparison of the story with the well-known legend of Buddha must convince every open-minded reader, that the outline of the plot is derived from the same Eastern source; in spite of all difference in detail, the general resemblance is quite undeniable. The writer himself tells us, that the story was brought to him from India, and it is highly probable, that what he heard was simply a version of the life of Buddha, adapted by Christians of the East to their own use. **Modern Engine Blueprinting Techniques** May 16 2021 Engine production for the typical car manufactured today is a study in mass production. Benefits in the manufacturing process for the manufacturer often run counter to the interests of the end user. What speeds up production and saves manufacturing costs results in an engine that is made to fall within a wide set of standards and specifications, often not optimized to meet the original design. In short, cheap and fast engine production results in a sloppy final product. Of course, this is not what enthusiasts want out of their engines. To maximize the performance of any engine, it must be balanced and blueprinted to the exact tolerances that the factory should have adhered to in the first place. Four cylinder, V-8, American or import, the performance of all engines is greatly improved by balancing and blueprinting. Dedicated enthusiasts and professional racers balance and blueprint their engines because the engines will produce more horsepower and torque, more efficiently use fuel, run cooler and last longer. In this book, expert engine builder and veteran author Mike Mavrigian explains and illustrates the most discriminating engine building techniques and perform detailed procedures, so the engine is perfectly balanced, matched, and optimized. Balancing and blueprinting is a time consuming and exacting process, but the investment in time pays off with superior performance. Through the process, you carefully measure, adjust, machine and fit each part together with precision tolerances, optimizing the design and maximizing performance. The book covers the block, crankshaft, connecting rods, pistons, cylinder heads, intake manifolds, camshaft, measuring tools and final assembly techniques. For more than 50 years, balancing and blueprinting has been an accepted and common practice for maxi
