The National Children's Study Research Plan Feb 24 2022 The National Children's Study (NCS) is planned to be the largest long-term study of environmental and genetic effects on children's health ever conducted in the United States. It proposes to examine the effects of environmental influences on the health and development of approximately 100,000 children across the United States, following them from before birth until age 21. By archiving all of the data collected, the NCS is intended to provide a valuable resource for analyses conducted many years into the future. This book evaluates the research plan for the NCS, by assessing the scientific rigor of the study and the extent to which it is being carried out with methods, measures, and collection of data and specimens to maximize the scientific yield of the study. The book concludes that if the NCS is conducted as proposed, the database derived from the study should be valuable for investigating hypotheses described in the research plan as well as additional hypotheses that will evolve. Nevertheless, there are important weaknesses and shortcomings in the research plan that diminish the study's expected value below what it might be.

To Kill a Mockingbird Apr 16 2021 Voted America's Best-Loved Novel in PBS's The Great American Read Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, *To Kill a Mockingbird* has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.

Beating the Devil Out of Them Oct 11 2020 Based on his studies of over 9,000 families, Murray A. Straus, the foremost researcher on family violence in the world, discusses the extent to which parents in the United States use corporal punishment (such as spanking and slapping) and its effects on their children. The question of whether corporal punishment is an effective method of discipline is hotly debated. Straus contends that this believed-to-be-"minor" form of physical violence is precursor to much violence that plagues our world. Children who are spanked quickly learn that love and violence can go hand in hand. Since spanking is generally done by loving, caring parents for the child's own good a child can learn that hitting is "morally right." Straus describes what he has learned through two decades of research: children who are spanked are from two to six times more likely to be physically aggressive, to become juvenile delinquents, and later, as adults, to use physical violence against their spouses, to have sadomasochistic tendencies, and to suffer from depression. Straus alerts parents to these risks, and argues that spanking adversely affects not only the children who are subjected to it but society as a whole. This groundbreaking book, now available

in paperback with a substantive new introduction and new concluding chapter, is essential reading for parents as well as teachers, lawyers, and judges. Professionals in fields such as social work, child protection, delinquency and criminology, psychology, and politics will find it of critical importance. *Politics and the English Language* Sep 02 2022 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's *Politics and the English Language* is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can - and must - be rediscovered with every age.' — Irish Times

Slouching Towards Bethlehem Aug 09 2020 The “dazzling” and essential portrayal of 1960s America from the author of *South and West* and *The Year of Magical Thinking* (The New York Times). Capturing the tumultuous landscape of the United States, and in particular California, during a pivotal era of social change, the first work of nonfiction from one of American literature’s most

distinctive prose stylists is a modern classic. In twenty razor-sharp essays that redefined the art of journalism, National Book Award-winning author Joan Didion reports on a society gripped by a deep generational divide, from the “misplaced children” dropping acid in San Francisco’s Haight-Ashbury district to Hollywood legend John Wayne filming his first picture after a bout with cancer. She paints indelible portraits of reclusive billionaire Howard Hughes and folk singer Joan Baez, “a personality before she was entirely a person,” and takes readers on eye-opening journeys to Death Valley, Hawaii, and Las Vegas, “the most extreme and allegorical of American settlements.” First published in 1968, *Slouching Towards Bethlehem* has been heralded by the New York Times Book Review as “a rare display of some of the best prose written today in this country” and named to Time magazine’s list of the one hundred best and most influential nonfiction books. It is the definitive account of a terrifying and transformative decade in American history whose discordant reverberations continue to sound a half-century later.

A Manual for Writers of Research Papers, Theses, and Dissertations, Eighth Edition Aug 21 2021 A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her *Manual for Writers* continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and Dissertations* has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of *The Chicago Manual of Style*. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, *A Manual for Writers* remains the essential resource for students and their teachers.

Recitatif Jan 26 2022 NEW YORK TIMES BEST SELLER • A beautiful, arresting story about race and the relationships that shape us through life by the legendary Nobel Prize winner—for the first time in a beautifully produced stand-alone edition, with an introduction by Zadie Smith “A puzzle of a story, then—a game.... When [Morrison] called Recitatif an ‘experiment’ she meant it. The subject of the experiment is the reader.” —Zadie Smith, award-winning, best-selling author of White Teeth In this 1983 short story—the only short story Morrison ever wrote—we meet Twyla and Roberta, who have known each other since they were eight years old and spent four months together as roommates in St. Bonaventure shelter. Inseparable then, they lose touch as they grow older, only later to find each other again at a diner, a grocery store, and again at a protest. Seemingly at

opposite ends of every problem, and at each other's throats each time they meet, the two women still cannot deny the deep bond their shared experience has forged between them. Another work of genius by this masterly writer, *Recitatif* keeps Twyla's and Roberta's races ambiguous throughout the story. Morrison herself described *Recitatif*, a story which will keep readers thinking and discussing for years to come, as "an experiment in the removal of all racial codes from a narrative about two characters of different races for whom racial identity is crucial." We know that one is white and one is Black, but which is which? And who is right about the race of the woman the girls tormented at the orphanage? A remarkable look into what keeps us together and what keeps us apart, and how perceptions are made tangible by reality, *Recitatif* is a gift to readers in these changing times.

Understanding Interventions That Encourage Minorities to Pursue Research Careers Nov 11 2020

Minority groups are severely underrepresented in the scientific workforce. To encourage minorities to pursue careers in research, a variety of "intervention programs" have been created at the pre-college, college, and graduate school levels. While there is a belief that these programs often achieve their goals, there is relatively little understanding of the factors that contribute to that success. The Division of Minority Opportunities in Research (MORE) at the National Institute of General Medical Sciences of the National Institutes of Health has established a grant program to support research to better understand the factors that contribute to the success of intervention programs. The MORE Division asked the National Academies to organize a workshop focusing on issues addressed by the grant program. This workshop summary presents examples of previous research on intervention programs, describes ways to formulate effective research questions and conduct research to identify the key elements that lead to successful intervention programs, and outlines ways to foster a community of researchers in this area.
