*Your Body, Your Voice* Nov 02 2022 In this innovative book, Theodore Dimon, EdD, shows how each part of the vocal organ (breathing, larynx, throat, and so on) works as part of a larger musculoskeletal system that is often interfered with, and how identifying this larger system and understanding in a practical way how it works allows a person to train and improve the voice, whether speaking or singing. Traditional vocal training methods, says Dimon, cannot be effective without restoring the functioning of the musculature that supports the voice. Enhanced with over 50 detailed full-color illustrations, the book discusses the fallacy of traditional breathing exercises and explains that the key to efficient breathing lies in the expansive support of the trunk and rib cage. Investigating the elements needed to produce a strong supported tone, Dimon describes the importance of voice “placement,” or directing the sound to a part of the body in order to produce a fully rounded, resonant tone. He identifies harmful patterns of speech and singing, and offers helpful methods for reestablishing the natural function of the vocal mechanism. Individual chapters cover elements of the whispered “ah,” producing a pure sung tone, vocal registers, the suspensory muscles of the larynx, and more.

Creating a Speaking and Listening Classroom

Oct 21 2021 Providing children with opportunities to talk about their learning enables teachers to hear what children are thinking. Talking with one another allows children to question, elaborate, and reflect on a range of ideas. Classroom talk can be motivating and involving, and helps children to think and learn. And yet it is difficult to organise such talk in a classroom. Children unaware of the importance of talk for learning may think of talk as "just chat" and learning falls away as they slip into social talk.

This book provides teachers with strategies and resources to enable whole classes to work together through the medium of talk. Creating a Speaking and Listening Classroom provides timely professional development for teachers. Based on a theoretical approach underpinned by classroom research, this book offers classroom-tested strategies for engaging children in their own learning. Such strategies involve the direct teaching of speaking and listening. Activities in the book can ensure that children know how and why to support one another's learning in whole-class and group work. The approach enables teachers to ensure that personalised learning programs are based on what children already think and know. The suggested strategies for teaching speaking and listening can enable children to use one another's minds as a rich resource. This stimulating book will be of interest to professionals in primary education, literacy co-ordinators, and trainee primary teachers.

In recent years, the rise of populism, the 'cancel culture' phenomenon, and online hate attacks are among the developments that have kept it at the forefront of both public and academic discussion. In this new introduction to the subject, Matteo Bonotti and Jonathan Seglow offer an accessible analysis of debates around freedom of speech. They introduce and critically examine three major philosophical arguments for freedom of

speech that are based on the values of truth, autonomy, and democracy. They apply these arguments to issues including hate speech, offensive speech, and pornography, and also tackle pressing current issues such as 'fake news' and public shaming.
