What You Do Is Who You Are Nov 08 2020 Ben Horowitz, a leading venture capitalist, modern management expert, and New York Times bestselling author, combines lessons both from history and modern organizational practice with practical and often surprising advice to help executives build cultures that can weather both good and bad times. Ben Horowitz has long been fascinated by history, and particularly by how people behave differently than you'd expect. The time and circumstances in which they were raised often shapes them - yet a few leaders have managed to shape their times. In What You Do Is Who You Are, he turns his attention to a question crucial to every organization: how do you create and sustain the culture you want? What You Do Is Who You Are explains how to make your culture purposeful by spotlighting four models of leadership and culture-building - the leader of the only successful slave revolt, Haiti's Toussaint Louverture; the Samurai, who ruled Japan for seven hundred years and shaped modern Japanese culture; Genghis Khan, who built the world's largest empire; and Shaka Senghor, an American ex-con who created the most formidable prison gang in the yard and ultimately transformed prison culture. Horowitz connects these leadership examples to modern case-studies, including how Louverture's cultural techniques were applied (or should have been) by Reed Hastings at Netflix, Travis Kalanick at Uber, and Hillary Clinton, and how Genghis Khan's vision of cultural inclusiveness has parallels in the work of Don Thompson, the first African-American CEO of McDonalds, and of Maggie Wilderotter, the CEO who led Frontier Communications. Horowitz then offers guidance to help any company understand its own strategy and build a successful culture. What You Do Is Who You Are is a journey through culture, from ancient to modern. Along the way, it answers a question fundamental to any organization: who are we?

Women Who Live Evil Lives Dec 22 2021 *Women Who Live Evil Lives* documents the lives and practices of mixed-race, Black, Spanish, and Maya women sorcerers, spell-casters, magical healers, and midwives in the social relations of power in Santiago de Guatemala, the capital of colonial Central America. Men and women from all sectors of society consulted them to intervene in sexual and familial relations and disputes between neighbors and rival shop owners; to counter abusive colonial officials, employers, or husbands; and in cases of inexplicable illness. Applying historical, anthropological, and gender studies analysis, Martha Few argues that women's local practices of magic, curing, and religion revealed opportunities for women's cultural authority and power in colonial Guatemala. Few draws on archival research conducted in Guatemala, Mexico, and Spain to shed new light on women's critical public roles in Santiago, the cultural and social connections between the capital city and the countryside, and the gender dynamics of power in the ethnic and cultural contestation of Spanish colonial rule in daily life.

The World Health Organization (WHO) Jul 05 2020 The World Health Organization (WHO), as the United Nations specialized agency for health, has been at the centre of international health cooperation for over sixty years. With origins dating from the nineteenth century, WHO's mandate is the attainment by all people of the highest possible level of health. The huge challenge of fulfilling this objective has not only required high-level technical skills, but has led the organization to engage with a broad range of political and economic interests. WHO has enjoyed many high-profile successes such as the global eradication of smallpox and SARS, and ongoing campaigns against polio and other diseases. On other issues, such as essential drugs, tobacco control and diet and nutrition, efforts to tackle the broader determinants of health has brought the organization into contact with issues such as globalization, poverty, social justice and human rights. Kelley Lee analyzes the WHO's role in international cooperation, examining its changing structures, key programmes and individuals. Of particular focus are the challenges WHO has faced in recent years given the emergence of other global health initiatives and how WHO has sought to remain effective as the "world's health conscience" within an increasingly complex global context.

"Those who Labor for My Happiness" Jul 29 2022 Our perception of life at Monticello has changed dramatically over the past quarter century. The image of an estate presided over by a benevolent Thomas Jefferson has given way to a more complex view of Monticello as a working plantation, the success of which was made possible by the work of slaves. At the center of this transition has been the work of Lucia "Cinder" Stanton, recognized as the leading interpreter of Jefferson's life as a planter and master and of the lives of his slaves and their descendants. This volume represents the first attempt to pull together Stanton's most important writings on slavery at Monticello and beyond. Stanton's pioneering work deepened our understanding of Jefferson without demonizing him. But perhaps even more important is the light her writings have shed on the lives of the slaves at Monticello. Her detailed reconstruction for modern readers of slaves' lives vividly reveals their active roles in the creation of Monticello and a dynamic community previously unimagined. The essays collected here address a rich variety of topics, from family histories (including the Hemingses) to the temporary slave community at Jefferson's White House to stories of former slaves' lives after Monticello. Each piece is characterized by Stanton's deep knowledge of her subject and by her determination to do justice to both Jefferson and his slaves. Published in association with the Thomas Jefferson Foundation.
