Conversations with Cosmo Feb 10 2021 In CONVERSATIONS WITH COSMO: AT HOME WITH AN AFRICAN GREY PARROT, Dr. Betty Jean Craige tells the story of her parrot's education in the language and culture of her human friends. Cosmo is a seven-year-old female Congo African Grey Parrot who by the

age of six had learned more than a hundred words and had uttered more than two hundred different phrases, makes up her own phrases, and is still learning. Craige recounts how Cosmo learned to talk, developed social skills and a sense of humor, and became an adorable feathery little person, a real party animal. Cosmo is funny-her first joke was "Telephone for bird!"-and so is Craige. Craige's purpose in writing this very entertaining book is not only to report and explain her parrot's acquisition of language and its cognitive abilities, but also-through Cosmo's story-to awaken readers To The mental activities of all the animals with whom we humans share space on our planet. The book has a preface by Irene Pepperberg, author of THE ALEX STUDIES and ALEX AND ME, and two appendices: a list of "Cosmo's Utterances" and a list of "Forty-Four Tips for Living with an African Grey" and an index.

Parrot Talk Jul 26 2019 Lucas and Grinder are more than a little surprised and confused to hear that their mother, Millie, who they haven't heard from in over thirty years, has died. Now her best friend wants them to come to Pittsburgh to take care of their mother's effects, chief among them being Paul. A road trip ensues with memorable stops at a Racino, a Pittsburgh landmark greasy spoon, and finally a ride on an incline trolley to meet their mother's friend, Janice. They are taken aback when she introduces them to Paul, an African grey parrot in the depths of grief, who has things to say that will change their lives. And so a transformative adventure begins.

The Photo Ark May 04 2020 This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to

mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet.

Parrot Tales Jan 30 2020 Charlie Parker is an African Grey Parrot. He entered the life of the Smith family three decades ago when they first encountered him in a downtown Manhattan bird shop and found him so irresistible, they had to bring him home. Charlie is many things in the Smith family, articulating them all in an astonishingly diverse and colorful vocabulary. He can be demanding, squawking imperiously "Clean my cage" or "Want some water." He can be very direct, warning an aggressive business associate who had been yelling at Debby "I'm going to kick your ass, you sonofabitch" He can be mischievous, making meowing noises to a neighbor's confused dog in the elevator. He is a survivor, who ended up recovering on an IV after the collapse of the World Trade Center filled the Smiths neighboring apartment with toxic dust. He is often the entertainer, with a songbook that extends across the opening bars of "Home on the Range" and "The Yellow Rose of Texas." Most of the time he is affectionate, as when he hangs upside down against the side of the cage and asks for his tummy to be tickled. In hearing Charlie's tales in this charming book, we come to realize that parrots are intelligent, sociable and loving creatures, to an extent that, as the renowned avian

scientist Professor Irene Pepperberg insists in her introduction, they cannot meaningfully be owned by humans but should rather be enjoyed as companions.

Alex & Me Dec 23 2021 On September 6, 2007, an African Grey parrot named Alex died prematurely at age thirty-one. His last words to his owner, Irene Pepperberg, were "You be good. I love you." What would normally be a quiet, very private event was, in Alex's case, headline news. Over the thirty years they had worked together, Alex and Irene had become famous—two pioneers who opened an unprecedented window into the hidden yet vast world of animal minds. Alex's brain was the size of a shelled walnut, and when Irene and Alex first met, birds were not believed to possess any potential for language, consciousness, or anything remotely comparable to human intelligence. Yet, over the years, Alex proved many things. He could add. He could sound out words. He understood concepts like bigger, smaller, more, fewer, and none. He was capable of thought and intention. Together, Alex and Irene uncovered a startling reality: We live in a world populated by thinking, conscious creatures. The fame that resulted was extraordinary. Yet there was a side to their

relationship that never made the papers. They were emotionally connected to one another. They shared a deep bond far beyond science. Alex missed Irene when she was away. He was jealous when she paid attention to other parrots, or even people. He liked to show her who was boss. He loved to dance. He sometimes became bored by the repetition of his tests, and played jokes on her. Sometimes they sniped at each other. Yet nearly every day, they each said, "I love you." Alex and Irene stayed together through thick and thin—despite sneers from experts, extraordinary financial sacrifices, and a nomadic existence from one university to another. The story of their thirty-year adventure is equally a landmark of scientific achievement and of an unforgettable human-animal bond.

The Simple Art of Flying Jun 16 2021 “Delightfully quirky.” —Kirkus Reviews Perfect for fans of *The One and Only Ivan*, this irresistible debut novel combines plucky humor and a whole lot of heart in a story about the true meaning of family. Sometimes flying means keeping your feet on the ground... Born in a dismal room in a pet store, Alastair the African grey parrot dreams of escape to bluer skies. He’d like nothing more than to fly away to a palm tree with his beloved sister, Aggie. But when Aggie is purchased by twelve-year-old Fritz, and Alastair is adopted by elderly dance-enthusiast and pie-baker Albertina Plopky, the future looks ready to crash-land. In between anxiously plucking his feathers, eating a few books, and finding his own poetic voice, Alastair plots his way to a family reunion. But soon he’s forced to choose between the life he’s always dreamed of and admitting the truth: that sometimes, the bravest adventure is in letting go.

Alex the Parrot Sep 19 2021 Recounts the true story of an African grey parrot who was the subject of a devoted graduate student's scientific experiment on animal intelligence and who astonished everyone with its ability to add, understand concepts and speak hundreds of words. By the author of *Aliens for Breakfast*.

Of Parrots and People Mar 02 2020 There are an estimated 50 million parrots in the United States today. Their intelligence and extraordinary personalities make them beloved members of the families that bring

them into their homes. In *Of Parrots and People*, award-winning journalist and long-time parrot owner Mira Tweti reveals the complex world of parrots—their astonishing intellect, often-intimate relationships with humans, and, unfortunately, the calamitous practices of the bird industry. Delving into the secret world of the global parrot trade, Tweti documents the forces driving these remarkable creatures to the brink of extinction. A critical addition to the popular shelf of books about animals and their behavior, *Of Parrots and People* is a startling wake-up call in the tradition of Rachel Carson's *Silent Spring*.

The Parrot Who Owns Me Sep 27 2019 “Birds are my passion,” says Joanna Burger, “but parrots are my weakness.” Fifteen years ago, when she adopted a neglected, orphaned thirty-six year old parrot named Tiko, she entered on one of the most complex relationships of her life. Sullen and hostile when he entered Dr. Burger’s home, Tiko gradually warmed as she carefully persuaded him of her good intentions. Eventually he courted her, building nests inside household furniture during mating season and trying to coax her into them. He nursed her vigilantly through a bout with Lyme disease, regularly preening each strand of hair on the pillow as she slept. For a while he even fought her husband for her attentions, but eventually theirs became a relationship of deep mutual trust. *The Parrot Who Owns Me* is also the story of the science of birds, and of parrots in particular (America’s third most commonly owned pet, after cats and dogs). Woven into the narrative are insights and fascinating revelations from Joanna Burger’s work — not only about parrots, but about what it means to be human. By turns delightful, hilarious, touching, and enlightening, *The Parrot Who Owns Me* introduces us to an unforgettable bird and his human companion, whose friendships tell us much about ourselves.

Handbook of Exotic Pet Medicine Dec 11 2020 Easy-to-use, comprehensive reference covering the less common species encountered in general veterinary practice Handbook of Exotic Pet Medicine provides easy-to-access, detailed information on a wide variety of exotic species that can be encountered in general veterinary practice. Offering excellent coverage of topics such as basic techniques, preventative health measures, and a formulary for each species, each chapter uses the same easy-to-follow format so that users can find information quickly while working in the clinic. Presented in full colour, with over 400 photographs, the book gives small animal practitioners the confidence to handle and treat more familiar pets such as budgerigars, African grey parrots, bearded dragons, corn snakes, tortoises, pygmy hedgehogs, hamsters and rats. Other species that may be presented less frequently including skunks, marmosets, sugar gliders, koi carp, chameleons and terrapins are also covered in detail to enable clinicians to quickly access relevant information. Provides comprehensive coverage of many exotic pet species that veterinarians may encounter in general practice situations Presents evidence-based discussions of topics including biological parameters, husbandry, clinical evaluation, hospitalization requirements, common medical and surgical conditions, radiographic imaging, and more The Handbook of Exotic Pet Medicine is an ideal one-stop reference for the busy general practitioner seeing the occasional exotic animal, veterinary surgeons with an established exotic animal caseload, veterinary students and veterinary nurses wishing to further their knowledge.

For the Love of Greys Oct 09 2020 Bobbi Brinker shares her knowledge and experience with African greys in all of the areas that are important for the pet owner and for the breeder. Bobbi's unsurpassed understanding

of the essential African grey is matched only by her ability to convey the information with respect, compassion, and empathy for greys and for the people with whom they share their lives. Bobbi's love and respect for these birds is obvious throughout the book. She offers sound, sensible information in a series of thought-provoking articles. The book represents the author's deep convictions drawn from years of observation and experience hand raising grey babies. Common misunderstandings about African greys are explained clearly and with an inescapable logic. The book contains important and vital information presented in a clear and relevant way for prospective African grey owners. Although the title leads one to conclude this book is exclusively about grey parrots, it is an important guide and reference for owners of all parrot species. Originally published and distributed by the author to aviaries and grey owners, Lucky Press is very proud to have obtained the worldwide English publishing rights to Bobbi Brinker's book and to offer the second edition of *For the Love of Greys* to the trade and to the public. This latest edition comes with a new, color cover and updated references sure to keep the reader up-to-date on the latest information. Many of the articles in this book have been translated into Italian, Japanese, Russian, and Polish on the World Wide Web. Many of her articles have been reprinted in bird club newsletters, nationally and internationally and offered as educational handouts at conferences and bird fairs. This book and her articles are given by other breeders to their clients to help them better understand and manage their African greys.

World's Worst Parrot Dec 31 2019 Ava works hard at maintaining a certain image online and at school. As far as anyone else knows, life is great. But when she inherits an African gray parrot from her great-uncle Bernie (whom she barely remembers), Ava's carefully crafted world starts to crumble. The parrot, Mervin, is loud and messy and obnoxious. Ava's brother thinks it's hilarious to post videos of Ava trying to deal with the crazy bird. He even creates a profile for the two of them. Everyone wants to see more of Ava and Mervin. Suddenly, Ava is internet famous—in the worst possible way. Her friends think the parrot is gross and start acting weird. But then a new girl at school helps Ava see that this parrot might not be the worst gift in the world and that just being yourself is the best way to be.

Remarkable Birds Nov 21 2021 Everything you didn't know about the avian world: a fascinating compendium showcasing the extraordinary wonders of birds, illuminated with exquisite ornithological illustrations, prints, and drawings Humans share the Earth with more than 10,000 species of birds and have always been enchanted by them. Birds can be a sign of the changing seasons, a symbol of freedom, or simply a breathtaking vision of beauty. Remarkable Birds approaches these fascinating creatures thematically across eight sections covering all aspects of humans' relationship with birds. "Songbirds" celebrates the greatest bird virtuosi, such as the nightingale, while "Birds of Prey" includes majestic hunters such as the harpy eagle. "Feathered Travelers" describes astounding journeys made by birds including tiny hummingbirds that migrate huge distances. "The Love Life of Birds" illuminates the most brilliant displays upon which different

species rely to find a mate—notably the extravagant plumage and dances of birds of paradise. “Avian Cities” explores the spectacular, large colonies of species such as the flamingo, while “Useful to Us” examines the diverse ways we find birds valuable, such as the turkey or the canary. “Threatened & Extinct” describes some species that have been lost forever, and others on the brink. Birds have also had great mystical significance and “Revered & Adored” considers such species as the sacred ibis, believed by the ancient Egyptians to represent the god Thoth.

Ruminations on a Parrot Named Cosmo Nov 29 2019 Last night as I was preparing to go out, Cosmo and I had this extended conversation: Ruminations on a Parrot Named Cosmo originated in a Sunday column I wrote for The Athens Banner-Herald from 2011 to 2013 titled "Cosmo Talks." I had already published a

book about Cosmo's learning to speak, *Conversations with Cosmo: At Home with an African Grey Parrot*, and I wanted to share anecdotes about Cosmo's hilarious antics with my local community. However, "Cosmo Talks" quickly evolved from accounts of Cosmo's activities to reflections on parrots' anatomy; birds' evolution from dinosaurs; the concept of nature; the evidence of consciousness in birds and mammals; the interdependence of all Earth's living organisms; and the similarities in mental life between humans and non-human animals. When I wrote "Cosmo Talks" I had two dogs, Kaylee and Mary, with whom Cosmo played. Now I have Cosmo alone, and she plays with me. She just walked into my study. I am here, she announced. Betty Jean: "No. Betty Jean gonna go in a car. Cosmo gonna stay home with doggies." Cosmo: "Doggies gonna go for a walk?" Betty Jean: "No, doggies gonna stay home with Cosmo." Cosmo: (muttering to herself) "Betty Jean gonna go to work." Cosmo: (out loud) "Good-bye." Betty Jean: "Good-bye, Cosmo. Good-bye, doggies. I love you."

Formed a Deep Bond in the Process "If you like parrots then you'll love this book. From their evolutionary past to their modern-day love lives, *Parrots of the Wild* presents a suitably captivating read. I thought I knew a lot about parrots--until I delved into these pages." —Tony Juniper, author of *What Has Nature Ever Done for Us?* and *Spix's Macaw: The Race to Save the World's Rarest Bird* *Parrots of the Wild* explores recent scientific discoveries and what they reveal about the lives of wild parrots, which are among the most intelligent and rarest of birds. Catherine A. Toft and Tim Wright discuss the evolutionary history of parrots and how this history affects perceptual and cognitive abilities, diet and foraging patterns, and mating and social behavior. The authors also discuss conservation status and the various ways different populations are adapting to a world that is rapidly changing. The book focuses on general patterns across the 350-odd species of parrots, as well as what can be learned from interesting exceptions to these generalities. A synthetic account of the diversity and ecology of wild parrots, this book distills knowledge from the authors' own research and from their review of more than 2,400 published scientific studies. The book is enhanced by an array of illustrations, including nearly ninety color photos of wild parrots represented in their natural habitats. *Parrots of the Wild* melds scientific exploration with features directed at the parrot enthusiast to inform and delight a broad audience.
