A Biographical Dictionary of Actors, Volume 1, Abaco to Belfille Mar 28 2022 To be completed in 12 volumes, this monumental work here begins publication with the first two volumes?Abaco to Bertie and Bertin to Byzard. When completed, it is expected that the biographical dictionary will include information on more than 8,500 individuals. Hundreds of printed sources have been searched for this project, and dozens of repositories combed, and the names of personnel listed have been filtered through parish registers whenever possible. From published and unpublished sources, from wills, archives of professional societies and guilds, from records of colleges, universities, and clubs, and from the contributions of selfless scholars, the authors have here assembled material which illuminates theatrical and musical activity in London in the 1660?1800 period. The information here amassed will doubtless be augmented by other specialists in Restoration and eighteenth-century theatre and drama, but it is not likely that the number of persons now known surely or conjectured finally to have been connected with theatrical enterprise in this period will ever be increased considerably. Certainly, the contributions made here add immeasurably to existing knowledge, and in a number of instances correct standard histories or reference works. The accompanying illustrations, estimated to be some 1,400 likenesses?at least one picture of each subject for whom a portrait exists?may prove to be a useful feature of the Work. The authors have

gone beyond embellishment of the text, and have attempted to list all original portraits any knowledge of which is now recoverable, and have tried to ascertain the present location of portraits in every medium.

Robert Estienne's Influence on Lexicography Dec 01 2019 Towering above printers of his time and their successors for many years afterward was the figure of Robert Estienne, the great French lexicographer of the sixteenth century, whose contribution to knowledge and its

dissemination is the subject of this authoritative book. The span of Robert Estienne's life (1503-1559) encompassed the historical epochs and events which shaped his career: the Renaissance, the Reformation, and the invention of printing by movable type. His keen interest in the revival of ancient literatures and languages and his training in the art of printing pointed the road he would travel, and the climate of opinion in the Reformation determined his destiny. Robert Estienne promoted classical learning by printing the works of good authors; to spread knowledge of ancient literature he compiled dictionaries and grammars which were adopted by most of the universities of Europe. His dictionary of proper names of Biblical and classical origin, the *Dictionarium historicum ac poeticum*, became one of the great source books for later compilers of dictionaries and for authors. His influence on English writers was pervasive. Ben Jonson showed familiarity with his texts; Spenser and Milton sometimes set translations of his phraseology directly into their poetry. Perpetuation of the few errors he made is one sure proof that his dictionaries were used and copied. An exemplar of learning in the classics and scripture, he searched in ancient manuscripts to avoid repeating the numerous errors that had crept into Bible translations over hundreds of years. For his efforts he was called a heretic by *docteurs de theologie* in the Sorbonne, but was protected by the royal favor of Francis I of France. Between attacks of theologians on the one side and the King's protection on the other, he became a "controversial" figure and after many years of calumny and persecution finally took refuge in Geneva. Estienne established a family tradition of printing correct and beautiful books, and the printing establishments which made the name of Estienne celebrated throughout the world continued for 162 years.

Social Administration Oct 11 2020 By making explicit linkages both to social work practice and to the history of management thought, covering the rapidly expanding field of nonprofit studies, and incorporating management approaches from Henri Fayol's principles to Total Quality Management, this pioneering work grounds the practice of social administration in the profession of social work and agency-based

practice better than any text presently available. The book also addresses ways in which the strategic vision of social administrators can be used to build humane and lasting welfare institutions, further social justice, and confront oppression. To accomplish this task, the authors blend several perspectives: social administration as management, as a form of social work practice emphasizing professional and community leadership, as decision making influenced by values and ethics and as institution building. Divided into an introduction, an afterword, and twenty-five topical chapters, *Social Administration* discusses issues of executive and program leadership as well as such environmental concerns as community, social agency, and a range of special topics, including accountability, ethics, contracting, and working with boards.

A Textual History of the King James Bible Mar 16 2021 David Norton re-edited the King James Bible for Cambridge, and this 2005 book arose from his intensive work on that project. Here he shows how the text of the most important Bible in the English language was made, and how, for better and for worse, it changed in the hands of printers and editors until, in 1769, it became the text we know today. Using evidence as diverse as the manuscript work of the original translators, and the results of extensive computer collation of electronically held texts, Norton has produced a scholarly edition of the King James Bible for the new century that will restore the authority of the 1611 translation. This book describes this fascinating background, explains Norton's editorial principles and provides substantial lists and tables of variant readings. It will be indispensable to scholars of the English Bible, literature, and publishing history.

Historical Dictionaries and Historical Dictionary Research Dec 13 2020 This volume is a collection of papers from the 1st International Conference on Historical Lexicography and Lexicology at the University of Leicester in 2002. The purpose of the conference was to bring together scholars and academics from around the world working as scholars and editors on historical dictionaries or as practising lexicographers. The papers are, accordingly, arranged in two sections, reflecting the distinction between those individuals working on the historical development of dictionaries and those considering the lexicological problems and challenges facing the lexicographer in attempting to represent as fully and justly as possible historical forms of the English language.

Britannia's Palette Nov 23 2021 *Britannia's Palette* looks at the lives of British artists who witnessed the naval war against the French Republic and Empire between 1793 and 1815. This band of brothers, through their artistic and entrepreneurial efforts, established the images of the war at sea that were central to the understanding their contemporaries had of events - images that endure to this day. In this unprecedented book, Nicholas Tracy reveals the importance of the self-employed artist to the study of a nation at war. He includes lively accounts of serving officers, retired sailors, and academy-trained artists who, often under the threat of debtor's prison, struggled to balance the standards of art with the public desire for heroic, reassuring images. Containing over eighty illustrations, *Britannia's Palette* explores a varied and exciting collection of paintings that reveal the poignancy of the human experience of war.
