Better Presentations Jun 16 2021 Whether you are a university professor, researcher at a think tank, graduate student, or analyst at a private firm, chances are that at some point you have presented your work in front of an audience. Most of us approach this task by converting a written document into slides, but the result is often a text-heavy presentation saddled with bullet points, stock images, and graphs too complex for an audience to decipher—much less understand. Presenting is fundamentally different from writing, and with only a little more time, a little more effort, and a little more planning, you can communicate your work with force and clarity. Designed for presenters of scholarly or data-intensive content, *Better Presentations* details essential strategies for developing clear, sophisticated, and visually captivating presentations. Following three core principles—visualize, unify, and focus—*Better Presentations* describes how to visualize data effectively, find and use images appropriately, choose sensible fonts and colors, edit text for powerful delivery, and restructure a written argument for maximum engagement and persuasion. With a range of clear examples for what to do (and what not to do), the practical package offered in *Better Presentations* shares the best techniques to display work and the best tactics for winning over audiences. It pushes presenters past the frustration and intimidation of the process to more effective, memorable, and persuasive presentations.

English for Academic Research: A Guide for Teachers Sep 19 2021 Scientific English is possibly the most rewarding area of EFL teaching. It differs from English for Academic Purposes (EAP) as it is directed to a much smaller audience: PhD and postdoc students. Courses on Scientific English are held in universities throughout the world, yet there is very little support for teachers in understanding what to teach and how to teach it. This guide is part of the English for Academic Research series. Part 1 of the book sheds light on the world of academia, the writing of research papers, and the role of journal editors and reviewers. Part 2 gives practical suggestions on how to help your students improve their presentation skills. In Part 3 you will learn how to teach academic skills using nonacademic examples. Parts 1-3 are thus useful for anyone involved in teaching academic English, whether they have used the other books in the series or not. Part 4 suggests two syllabuses for teaching writing and presenting skills, based on the two core books: *English for Writing Research Papers* *English for Presentations at International Conferences* This book will help you i) understand the world of your students (i.e. academic research), ii) plan courses, and iii) exploit the What's the Buzz? sections in the books on Writing, Presentations, Correspondence and Interacting on Campus. Adrian Wallwork has written over 30 books covering General English (Cambridge University Press, Scholastic), Business English (Oxford University Press), and Scientific English (Springer). He has trained several thousand PhD students from all over the world to write and present their research. Adrian also runs a scientific editing service: English for Academics (E4AC).

The Technical Production Handbook Mar 26 2022 This handbook is designed for specific use by performing arts presenters and touring companies. These companies pose an immense range of production requirements and challenges to a presenter. The book stresses the basics of technical production with an emphasis on presenting dance. Dance has more inherent pitfalls in its production requirements, yet is on tour the most of any of the performing arts. The first section deals with needs and responsibilities common to both theater and dance. The second section

singles out separate production aspects of each. The third section is a glossary of terms to help the presenter understand the technical language of production. Chapters include: (1) "Introduction"; (2) "Presenters and Performers"; (3) "Differences between Disciplines"; and (4) "What Does It Mean? A Glossary of Terms." Appendices offer additional information on technical riders, technical questionnaires, sample light plots, section drawing of the theater, fly system cross-section, and hanger log. (EH)

Native Host Plants for Texas Butterflies Aug 26 2019 While many growers focus on attracting adult butterflies to their gardens, fewer know about the plants that caterpillars need to survive. Native host plants—wildflowers, trees, shrubs, vines, grasses, and sedges—not only provide a site for the butterfly to lay its eggs, they also provide a ready food source for the emerging caterpillar. Think of these plants as the nurseries of the garden. This user-friendly, heavily illustrated field guide describes 101 native larval host plants in Texas. Each species account includes descriptive information on each plant, a distribution map, and photos of both the caterpillars and adult butterflies who frequent those plants. An adult butterfly may nectar on a wide variety of flowers, but caterpillars are much more restricted in their food sources. Some feed on only a limited number of plant species, so female butterflies seek out these specific plants to lay their eggs. For example, the host plants for Monarch caterpillars are various species of milkweed. Often, these plants are not the same as the ones the adult butterfly will later use for nectar. Learning more about the plants caterpillars need is crucial for butterfly conservation. Butterflies' dependency on specific caterpillar host plants is one of the key factors restricting their range and distribution. Armed with this knowledge, readers can also hone their ability to find specific species of breeding butterflies in nature. This is a handy guide whether you are in the field searching for butterflies or on the hunt for butterfly-friendly options at your local plant sale.
