Threat Communication and the US Order after 9/11 Jan 18 2022 This volume investigates the perception of threat, with particular regard to the roles, functions, and agencies of various types of media. With a focus on the profound impact of the terrorist attacks on September 11, 2001 on the US-American political, social, and cultural order, the chapters reach from the early days after the attacks up to the 2016 election of

Donald J. Trump. An international team of contributors analyze how the perceived threats and their subsequent representations changed during this period and what part different forms of media - media institutions, media technologies, and media formats - played within these transformations. Media theoretical perspectives are thus combined with historical approaches to examine the "re-ordering" of the nation, the state, and society proposed in an increasingly converging, multimodal, and networked media environment. This book's focus on the interrelation between Media Studies, Cultural Studies, and American Studies makes it an indispensable landmark for fields such as Historical Research, Media Theory, Narratology, and Popular Culture Studies.

Drones and the Ethics of Targeted Killing Jan 06

2021 Drones have become an essential part of U.S. national security strategy, but most Americans know little about how they are used, and we receive conflicting reports about their outcomes. In *Drones and the Ethics of Targeted Killing*, ethicist Kenneth R. Himes provides not only an overview of the role of drones in national security but also an important exploration of the ethical implications of drone warfare—from the impact on terrorist organizations and civilians to how piloting drones shapes soldiers. Targeted killings have played a role in politics from ancient times through today, so the ethical challenges around how to protect against threats are not new. Himes leads readers through the ethics of targeted killings in history from ancient times to the contemporary Israeli-Palestinian conflict, then looks specifically at the new issues raised through the use of drones. This book is a powerful look at a pressing topic today.

The Back Channel Feb 07 2021 "A masterful diplomatic memoir" (The Washington Post) from CIA director and career ambassador William J. Burns, from his service under five presidents to his personal encounters with Vladimir Putin and other world leaders—an impassioned argument for the enduring value of diplomacy in an increasingly volatile world. Over the course of more than three decades as an American diplomat, William J. Burns played a central role in the most consequential diplomatic episodes of

his time—from the bloodless end of the Cold War to the collapse of post-Cold War relations with Putin’s Russia, from post-9/11 tumult in Afghanistan, Iraq, and the Middle East to the secret nuclear talks with Iran. In *The Back Channel*, Burns recounts, with novelistic detail and incisive analysis, some of the seminal moments of his career. Drawing on a trove of newly declassified cables and memos, he gives readers a rare inside look at American diplomacy in action. His dispatches from war-torn Chechnya and Qaddafi’s bizarre camp in the Libyan desert and his warnings of the “Perfect Storm” that would be unleashed by the Iraq War will reshape our understanding of history—and inform the policy debates of the future. Burns sketches the contours of effective American leadership in a world that resembles neither the zero-sum Cold War contest of his early years as a diplomat nor the “unipolar moment” of American primacy that followed. Ultimately, *The Back Channel* is an eloquent, deeply informed, and timely story of a life spent in service of American interests abroad. It is also a powerful reminder, in a time of great turmoil, of the enduring importance of diplomacy.

Four Guardians Jun 11 2021 "This book explains who the four US military services truly are and why they make and execute policy as they do. The book focuses on American civil-military relationships, explaining why the services imperfectly satisfy their civilian bosses and why the four services think and act so differently from one another. Ultimately, the book offers three independent but mutually reinforcing contributions to the fields of security studies and American civil-military relations. First, it builds on one of the major theoretical approaches to civil-military relations--agency theory--and identifies key conditions under which agency theory best explains military service behavior. Author Jeffrey W. Donnithorne provides a "principled agent" model that finds four unique condition sets that explain civil-military dynamics with new clarity. Second, the book exposes the importance of service culture in civil-military relations and offers a rich yet concise portrait of each of the four US military services: the Army, Navy, Air Force, and Marine Corps. Third, the book offers two important case

studies of civil-military policymaking. These two cases demonstrate the principled agent framework in action, while amply revealing the four services as distinctly different political actors. Finally, the book offers both conclusions and implications for today's security environment, suggesting likely pathways where the services will diverge in their approach to current defense issues. With theoretical novelty, empirical depth, and engaging military history, the book aims to reach academics, practitioners, and general readers alike"--

This research and policy book examines the role of women in the military and the overwhelming evidence to date that warranted repealing the combat exclusion policy. It explores the following questions: How can the success of women in the military serve as justification for its repeal? What will be the potential impact of repealing the policy on the recruitment, promotion and retention of women in the military? How will repealing the combat exclusion policy change the ways in which military men relate to military women? How can repealing the policy set women on the course toward full agency and representation as full citizens in American society at large? Not only

will this book help in filling the gaps of the existing literature of public administration and public policy about women in the military but it will provide the personal insights of women who have served under the combat exclusion policy.

Melvin Laird and the Foundation of the Post-Vietnam Military, 1969-1973 Apr 21 2022

"[E]xamines the former Congressman Melvin Laird's efforts to reconstitute the Department of Defense during the last years of the Vietnam war... Laird acted to mitigate the adverse effects of the Vietnam War on the department and to prepare the nation's armed forces for the future. Foremost was the transition from a conscripted military to an all-volunteer force, a fundamental policy shift that ended an unpopular and inequitable draft system."--from jacket.

Beyond Deportation Nov 16 2021 The first book to comprehensively describe the history, theory, and application of prosecutorial discretion in immigration law When Beatles star John Lennon faced deportation from the U.S. in

the 1970s, his lawyer Leon Wildes made a groundbreaking argument. He argued that Lennon should be granted "nonpriority" status pursuant to INS's (now DHS's) policy of prosecutorial discretion. In U.S. immigration law, the agency exercises prosecutorial discretion favorably when it refrains from enforcing the full scope of immigration law. A prosecutorial discretion grant is important to an agency seeking to focus its priorities on the "truly dangerous" in order to conserve resources and to bring compassion into immigration enforcement. The Lennon case marked the first moment that the immigration agency's prosecutorial discretion policy became public knowledge. Today, the concept of prosecutorial discretion is more widely known in light of the Obama Administration's Deferred Action for Childhood Arrivals or DACA program, a record number of deportations and a stalemate in Congress to move immigration reform. Beyond Deportation is the first book to comprehensively describe the history, theory, and application of prosecutorial discretion in immigration law. It provides a rich history of the role of prosecutorial discretion in the immigration system and unveils the powerful role it plays in protecting individuals from deportation and saving the government resources. Shoba Sivaprasad Wadhia draws on her years of experience as an immigration attorney, policy leader, and law professor to advocate for a bolder standard on prosecutorial discretion, greater mechanisms for accountability when such standards are ignored, improved transparency about the cases involving prosecutorial discretion, and recognition of "deferred action" in the law as a formal benefit. [Enter the Alternative School](#) Dec 17 2021 Enter the Alternative School is an in-depth examination of public school alternatives to traditional educational models in the US. This book analyses how urban education can respond to a system growing increasingly standardised and privatised. As an example, Central Park East Secondary School (CPESS), a public alternative schooling model, successfully served predominantly low-income and minority students. It also changed the New York City public school system while promoting methods that allowed educational institutions to make

changes in the lives of their students. Written by a sociologist who was both a student at CPESS and a teacher at a school developed from the CPESS model, the book analyses education from a range of vantage points, assesses outcomes, and invites readers to consider the potential of alternative educational models to address the challenges of reforms that attempt to provide quality education to the low-income and minority students otherwise under served by public schools.

Selling the Silver Bullet Jul 12 2021

Originating as a radio series in 1933, the Lone Ranger is a cross-media star who has appeared in comic strips, comic books, adult and juvenile novels, feature films and serials, clothing, games, toys, home furnishings, and many other consumer products. In his prime, he rivaled Mickey Mouse as one of the most successfully licensed and merchandised children's properties in the United States, while in more recent

decades, the Lone Ranger has struggled to resonate with consumers, leading to efforts to rebrand the property. The Lone Ranger's eighty-year history as a lifestyle brand thus offers a perfect case study of how the fields of licensing, merchandizing, and brand management have operated within shifting industrial and sociohistorical conditions that continue to redefine how the business of entertainment functions. Deciphering how iconic characters gain and retain their status as cultural commodities, *Selling the Silver Bullet* focuses on the work done by peripheral consumer product and licensing divisions in selectively extending the characters' reach and in cultivating investment in these characters among potential stakeholders. Tracing the Lone Ranger's decades-long career as intellectual property allows Avi Santo to analyze the mechanisms that drive contemporary character licensing and entertainment brand management practices, while at the same time situating the licensing field's development within particular sociohistorical and industrial contexts. He also offers a nuanced assessment of the ways that character licensing firms and consumer product divisions have responded to changing cultural and economic conditions over the past eighty years, which will alter perceptions about the creative and managerial authority these ancillary units wield.

Risk and Presidential Decision-making Nov 04 2020 This book aims at gauging whether the nature of US foreign policy decision-making has changed after the Cold War as radically as a large body of literature seems to suggest, and develops a new framework to interpret presidential decision-making in foreign policy. It locates the study of risk in US foreign policy in a wider intellectual landscape that draws on

contemporary debates in historiography, international relations and Presidential studies. Based on developments in the health and environment literature, the book identifies the President as the ultimate risk-manager, demonstrating how a President is called to perform a delicate balancing act between risks on the domestic/political side and risks on the strategic/international side. Every decision represents a 'risk vs. risk trade-off,' in which the management of one 'target risk' leads to the development 'countervailing risks.' The book applies this framework to the study three major crises in US foreign policy: the Cuban Missile Crisis, the seizure of the US Embassy in Tehran in 1979, and the massacre at Srebrenica in 1995. Each case-study results from substantial archival research and over twenty interviews with policymakers and academics, including former President Jimmy Carter and former Senator Bob Dole. This book is ideal for postgraduate researchers and academics in US foreign policy, foreign policy decision-making and the US Presidency as well as Departments and Institutes dealing with the study of risk in the social sciences. The case studies will also be of great use to undergraduate students.
