Jésus est juif en Amérique Aug 24 2019 L'alliance solide et profonde qui unit les Etats-Unis et Israël depuis plus de soixante ans est communément attribuée à l'influence d'un lobby juif tout-puissant qui tirerait les ficelles de la politique étrangère américaine au Moyen-Orient. Or cette vision réductrice néglige un aspect essentiel de la question : aux Etats-Unis, les supporters d'Israël les plus fervents et nombreux sont aujourd'hui issus de la droite chrétienne. Ces partisans dévoués de l'Etat juif, que l'on appelle chrétiens sionistes, sont convaincus qu'il relève de leur devoir religieux d'aimer et de protéger Israël. Depuis une quarantaine d'années, ils se sont constitués en groupe de pression et ont gagné une influence sans précédent dans le système politique, aidés par l'explosion du conservatisme et par leur partenariat avec les faucons israéliens. De George W. Bush à Sarah Palin, le soutien à Israël est désormais une figure imposée de tout candidat républicain. En plongeant dans l'univers exalté des chrétiens sionistes, Célia Belin dévoile l'extraordinaire montée en puissance d'un mouvement politique inspiré d'une théologie archaïque, fondamentaliste et radicale. A l'heure de mettre un terme au conflit qui empoisonne le Proche-Orient depuis des décennies, l'Europe, les Etats-Unis et tous les partisans de la paix doivent garder un œil sur ces amoureux transis et incontrôlables d'Israël. Les Israéliens aussi doivent se méfier de ces nouveaux amis tombés du ciel. En mélangeant religion et politique, les chrétiens sionistes contribuent à transformer le conflit territorial entre Israéliens et Palestiniens en un combat pour la vérité religieuse.

Race and Morality Oct 07 2020 This book attempts to explain why it has been so difficult to solve America's racial problems as the country has moved from what the author describes as a closed caste to an open class society. The author contends that Americans fail to perceive how the legacy of slavery interferes with social mobility and highlights the values that middle-class blacks and whites need to uphold, most prominently the emphasis on freedom as opposed to total equality.

Germany's New Partners Mar 24 2022 In the wake of the 2008 financial crisis Germany became Europe's most influential nation state. This book aims to provide a comparative assessment of how this is reflected in the country's bilateral security relationships with key global and regional partners. Prepared by an international team of scholars, it offers unique, in-depth perspectives on the ways these evolving interactions affect the prospects for addressing recent and emerging security challenges.

Legal and Healthcare Ethics for the Elderly Jul 16 2021 Increasingly, legislators at the state and federal levels of government are forced to evaluate and act upon the unique problems presented by an aging American public. A domino effect has occurred, evoking concern in educational circles to deal with the varied, complex issues associated with the "new" gerontology. This expanded focus brings in not only mental and public health delivery issues, but reaches and impacts on the social sciences, ethics, law and medicine as well as public policy. In response to these matters, Legal and Healthcare Ethics for the Elderly provides a balanced analytical presentation of the complicated socio-legal, medico-ethical and political perspectives which interact with gerontology as a field of study. In a straightforward and unambiguous style, it covers information on access and financing healthcare, the ethics of rationing healthcare and the inevitable link to the quality of life, guardianship issues in a nursing home setting, informed consent, living wills and durable powers of attorney, elder abuse, and death with dignity. The economics of care giving is charted and directed by the sometimes harsh realities of the marketplace. Thus, the various philosophical and ethical dilemmas which confront the process of aging are examined here both from a micro- and from a macro-economic perspective. This book exemplifies that it is vitally important to be educated now, to be prepared for the future and thereby make informed decisions - for both ourselves and our loved ones.

Plume May 02 2020 The poems in Plume are nuclear-age songs of innocence and experience set in the "empty" desert West. Award-winning poet Kathleen Flenniken grew up in Richland, Washington, at the height of the Cold War, next door to the Hanford Nuclear Reservation, where "every father I knew disappeared to fuel the bomb," and worked at Hanford herself as a civil engineer and hydrologist. By the late 1980s, declassified documents revealed decades of environmental contamination and deception at the

plutonium production facility, contradicting a lifetime of official assurances to workers and their families that their community was and always had been safe. At the same time, her childhood friend Carolyn's own father was dying of radiation-induced illness: "blood cells began to err one moment efficient the next / a few gone wrong stunned by exposure to radiation / as [he] milled uranium into slugs or swabbed down / train cars or reported to B Reactor for a quick run-in / run-out." Plume, written twenty years later, traces this American betrayal and explores the human capacity to hold truth at bay when it threatens one's fundamental identity. Flenniken observes her own resistance to facts: "one box contains my childhood / the other contains his death / if one is true / how can the other be true?" The book's personal story and its historical one converge with enriching interplay and wide technical variety, introducing characters that range from Carolyn and her father to Italian physicist Enrico Fermi and Manhattan Project health physicist Herbert Parker. As a child of "Atomic City," Kathleen Flenniken brings to this tragedy the knowing perspective of an insider coupled with the art of a precise, unflinching, gifted poet. Reconsidering Constitutional Formation I National Sovereignty Nov 19 2021 This open access book can be downloaded from

link.springer.com Legal studies and consequently legal history focus on constitutional documents, believing in a nominalist autonomy of constitutional semantics. Reconsidering Constitutional Formation in the late 18th and 19th century, kept historic constitutions from being simply log-books for political experts through a functional approach to the interdependencies between constitution and public discourse. Sovereignty had to be 'believed' by the subjects and the political élites. Such a communicative orientation of constitutional processes became palpable in the 'religious' affinities of the constitutional preambles. They were held as 'creeds' of a new order, not only due to their occasional recourse to divine authority, but rather due to the claim for eternal validity contexts of constitutional guarantees. The

communication dependency of constitutions was of less concern in terms of the preamble than the constituents' big worries about government organisation. Their indecisiveness between monarchical and popular sovereignty was established through the discrediting of the Republic in the Jacobean reign of terror and the 'renaissance' of the monarchy in the military resistance against the French revolutionary and later Napoleonic campaigns. The constitutional formation as a legal act of constituting could therefore defend the monarchy from the threat of the people (Albertine Statute 1848), could be a legal decision of a national constituent assembly (Belgian Constitution 1831), could borrow from the old liberties (Polish May Constitution 1791) or try to remain in between by referring to the Nation as sovereign (French September Constitution 1791, Cádiz Constitution 1812). Common to all contexts is the use of national sovereignty as a legal starting point. The consequent differentiation between constituent and constituted power manages to justify the self-commitment of political power in legal terms. National sovereignty is the synonym for the juridification of sovereignty by means of the constitution. The novelty of the constitutions of the late 18th and 19th century is the normativity, the positivity of the constitutional law as one unified law, to be the measure for the legality of all other law. Therefore ReConFort will continue with the precedence of constitution. (www.reconfort.eu)

Capitales et patrimoines à l'heure de la globalisation Nov 27 2019 « Capitale et patrimoine » : si l'association des deux termes pourra paraître aller de soi après la lecture de cet ouvrage, elle n'avait à priori rien d'évident. Elle n'est pas pour autant le produit du télescopage fortuit de termes jusque-là abordés séparément, le patrimoine d'un côté, la capitale de l'autre. Elle ne procède pas davantage, si l'on veut se situer dans la perspective épistémologique qu'elle ouvre, de la volonté d'identifier et d'explorer les zones où se superposent trois champs de recherche : le patrimoine et, corollaire de la question capitulaire, la ville et la politique. Si au final, c'est bien en partie à cette triple inscription que l'on aboutit, l'on ne peut néanmoins s'en réclamer comme d'un point de départ. Plus subtilement, la problématique de cet ouvrage résulte du dialogue de recherches en cours sur le patrimoine qui, d'une manière ou d'une autre avaient déjà à voir avec des villes capitales : Québec, Montréal, Tunis.
