Faster, Smarter, Greener Jun 03 2020 A call to redefine mobility so that it is connected, heterogeneous, intelligent, and personalized, as well as sustainable, adaptable, and city-friendly. The twentieth century was the century of the automobile; the twenty-first will see mobility dramatically re-envisioned. Automobiles altered cityscapes, boosted economies, and made personal mobility efficient and convenient for many. We had a century-long love affair with

the car. But today, people are more attached to their smartphones than their cars. Cars are not always the quickest mode of travel in cities; and emissions from the rapidly growing number of cars threaten the planet. This book, by three experts from industry and academia, envisions a new world of mobility that is connected, heterogeneous, intelligent, and personalized (the CHIP architecture). The authors describe the changes that are coming. City administrators are shifting from designing cities for cars to designing cities for people. Nations and cities will increasingly employ targeted user fees and offer subsidies to nudge consumers toward more sustainable modes. The sharing economy is coaxing many consumers to shift from being owners of assets to being users of services. The auto industry is responding with connected cars that double as virtual travel assistants and by introducing autonomous driving. The CHIP architecture embodies an integrated, multimode mobility system that builds on ubiquitous connectivity, electrified and autonomous vehicles, and a marketplace open to innovation and entrepreneurship. Consumers will exercise choice on the basis of user experience and efficiency, aided by “intelligent advisors,” accessible through their mobile devices. An innovative mobility architecture reconfigured for this century is a social and economic necessity; this book charts a course for achieving it.

The DK Handbook, MLA Update Nov 20 2021 For courses in Writing. This version of The DK Handbook has been updated to reflect the 8th Edition of the MLA Handbook (April 2016)* A student-centric approach to writing The DK Handbook represents a true marriage of visual and textual content, in which each topic is presented in self-contained, two-page spreads for at-a-glance referencing. Explanations are concise and "chunked" to be more approachable and appealing for today's readers, and accompanying visuals truly teach - making concepts and processes accessible to students. The class-tested layout creates a consistent look and feel that helps students connect with the material, find information, and recognize solutions to writing problems. * The 8th Edition introduces sweeping changes to the philosophy and details of MLA works cited entries. Responding to the "increasing mobility of texts," MLA now encourages writers to focus on the process of crafting the citation, beginning with the same questions for any source. These changes, then, align with current best practices in the teaching of writing which privilege inquiry and critical thinking over rote recall and rule-following.

MLA Handbook Aug 06 2020 The Modern Language Association, the authority on research and writing, takes a

fresh look at documenting sources in the eighth edition of the MLA Handbook, the official guide to MLA format. Works are published today in a dizzying variety of ways: a novel, for example, may be read in print, online, or as an e-book—or perhaps listened to as an audiobook. Writers of research papers routinely need to know how to cite works on Web sites, videos on platforms like YouTube, interviews and other works created by multiple authors, journal articles contained in databases, online images, posts on social media sites, song lyrics, and more. Instead of providing separate instructions for each format, the MLA's unique, innovative approach recommends one set of guidelines that writers can apply to any type of source. This groundbreaking edition of the MLA's best-selling handbook is short and designed for easy use. It guides writers through the principles behind evaluating sources for their research and thus focuses on the key skills of information and digital literacy. It then shows writers how to cite sources in their writing, offering detailed guidance on in-text citations, quoting and paraphrasing, avoiding plagiarism, and more. Intended for students, teachers, librarians, and advanced scholars, the handbook is an indispensable resource in composition, communication, literature, language arts, film, media studies, digital humanities, and related fields.

Writing New Media Aug 18 2021 As new media mature, the changes they bring to writing in college are many and suggest implications not only for the tools of writing, but also for the contexts, personae, and conventions of writing. An especially visible change has been the increase of visual elements—from typographic flexibility to the easy use and manipulation of color and images. Another would be in the scenes of writing—web sites, presentation "slides," email, online conferencing and coursework, even help files, all reflect non-traditional venues that new media have brought to writing. By one logic, we must reconsider traditional views even of what counts as writing; a database, for example, could be a new form of written work. The authors of Writing New Media bring these ideas and the changes they imply for writing instruction to the audience of rhetoric/composition scholars. Their aim is to expand the college writing teacher's understanding of new media and to help teachers prepare students to write effectively with new media beyond the classroom. Each chapter in the volume includes a lengthy discussion of rhetorical and technological background, and then follows with classroom-tested assignments from the authors' own teaching.

Mexican Literature in Theory Nov 08 2020 Mexican Literature in Theory is the first book in any language to engage post-independence Mexican literature from the perspective of current debates in literary and cultural theory. It brings together scholars whose work is defined both by their innovations in the study of Mexican literature and by the theoretical sophistication of their scholarship. Mexican Literature in Theory provides the reader with two contributions. First, it is one of the most complete accounts of Mexican literature available, covering both canonical texts as well as the most important works in contemporary production. Second, each one of the essays is in itself an important contribution to the elucidation of specific texts. Scholars and students in fields such as Latin American studies, comparative literature and literary theory will find in this book compelling readings of literature from a theoretical perspective, methodological suggestions as to how to use current theory in the study of literature, and important debates and revisions of major theoretical works through the lens of Mexican literary works.

Approaches to Teaching Dante's Divine Comedy Mar 13 2021 Dante's Divine Comedy can compel and shock readers: it combines intense emotion and psychological insight with medieval theology and philosophy. This volume will help instructors lead their students through the many dimensions—historical, literary, religious, and ethical—that make the work so rewarding and enduringly relevant yet so difficult. Part 1, "Materials," gives instructors an overview of the important scholarship on the Divine Comedy. The essays of part 2, "Approaches," describe ways to teach the work in the light of its contemporary culture and ours. Various teaching situations (a first-year seminar, a creative writing class, high school, a prison) are considered, and the many available translations are discussed.

Cooked Oct 08 2020 Michael Pollan, the bestselling author of *The Omnivore's Dilemma*, *Food Rules*, *How to Change Your Mind*, and *This is Your Mind on Plants* explores the previously uncharted territory of his own kitchen in *Cooked*. "Having described what's wrong with American food in his best-selling *The Omnivore's Dilemma* (2006), New York Times contributor Pollan delivers a more optimistic but equally fascinating account of how to do it right. . . . A delightful chronicle of the education of a cook who steps back frequently to extol the scientific and philosophical basis of this deeply satisfying human activity." —Kirkus (starred review) *Cooked* is now a Netflix docuseries based on the book that focuses on the four kinds of "transformations" that occur in cooking. Directed by Oscar-winning filmmaker Alex Gibney and starring Michael Pollan, *Cooked* teases out the links between science, culture and the flavors we love. In *Cooked*, Pollan discovers the enduring power of the four classical elements—fire, water, air, and earth—to transform the stuff of nature into delicious things to eat and drink. Apprenticing himself to a succession of culinary masters, Pollan learns how to grill with fire, cook with liquid, bake bread, and ferment everything from cheese to beer. Each section of *Cooked* tracks Pollan's effort to master a single classic recipe using one of the four elements. A North Carolina barbecue pit master tutors him in the primal magic of fire; a Chez Panisse-trained cook schools him in the art of braising; a celebrated baker teaches him how air transforms grain and water into a fragrant loaf of bread; and finally, several mad-genius "fermentos" (a tribe that includes brewers, cheese makers, and all kinds of picklers) reveal how fungi and bacteria can perform the most amazing alchemies of all. The reader learns alongside Pollan, but the lessons move beyond the practical to become an investigation of how cooking involves us in a web of social and ecological relationships. Cooking, above all, connects us. The effects of not cooking are similarly far reaching. Relying upon corporations to process our food means we consume large quantities of fat, sugar, and salt; disrupt an essential link to the natural world; and weaken our relationships with family and friends. In fact, *Cooked* argues, taking back control of cooking may be the single most important step anyone can take to help make the American food system healthier and more sustainable. Reclaiming cooking as an act of enjoyment and self-reliance, learning to perform the magic of these everyday transformations, opens the door to a more nourishing life.
