[Hats, Caps & Bonnets: 1855-1875](#) Sep 19 2019 In this remarkable book, costumer and researcher Marianne Burke presents a richly illustrated study of headwear in the twenty-year period between 1855-1875. Her detailed discussion of the development of hair and headwear styles throughout this era is accompanied by period photographs known as cartes de visite, as well as numerous illustrations from fashion periodicals of the time such as Godey's Lady's Book, Harper's Bazar and Peterson's Magazine. It was during these years that the luxurious French lady dolls, so ardently collected today, assumed their great popularity. Collectors of these dolls have long been frustrated by the lack of accessible instructions and patterns for headwear for their elegant models. This is the first book to teach methods of constructing historically correct hats, caps and bonnets for French fashion dolls of the mid-to-late nineteenth century. The methods of assembly taught pertain to styles for dolls of more contemporary periods, as well. Ms. Burke offers instruction in the practical matters of millinery construction; chapters on tools, materials, making bonnet frames and working with straw and felt provide step-by-step directions and culminate in the presentation of twelve fully illustrated patterns for making hats, caps and bonnets for lady dolls. Doll costumers, restorers and collectors will find this invaluable compendium an essential resource, while lovers of fashion history will revel in its visual delights.

[Fight the Power!](#) Aug 19 2019 Shelton Jackson «Spike» Lee is one of the most culturally influential and provocative film directors of the twentieth and twenty-first centuries. Bringing together seminal writings - from classic scholarship to new research - this book focuses on this revolutionary film auteur and cultural provocateur to explore contemporary questions around issues of race, politics, sexuality, gender roles, filmmaking, commercialism, celebrity, and the role of media in public discourse. Situating Lee as an important contributor to a variety of American discourses, the book highlights his commitment to exploring issues of relevance to the Black community. His work demands that his audiences take inventory of his and their understandings of the complexities of race relations, the often deleterious influence of media messages, the long term legacy of racism, the liberating effects of sexual freedom, the controversies that arise from colorism, the separatist nature of classism, and the cultural contributions and triumphs of historical figures. This book seeks to stimulate continued debate by examining the complexities in Lee's various sociopolitical claims and their ideological impacts.

[Underneath It All](#) Oct 01 2020 Professional hockey player Rob D'Amico is confused when he's chosen to take part in a reading program for inner-city students. While athletes are role models, he tends toward the gregarious and playful side, rather than a studious bent. Despite the lack of funding plaguing her inner-city district, every day kindergarten teacher Alaina Rossa ensures her students learn something to prepare them for life. At first she's unsure how a hockey player will help her achieve that goal. When Rob visits Alaina's class for the first time, they welcome him with open arms, despite the lack of even the basic supplies for their education. He takes it upon himself to get the students what they need, sweeping Alaina up in the excitement. As time goes by and she learns more about Rob, Alaina finds her heart opening to him. Is it possible her soul mate could be found in a world so different from her own? And for Rob, the last person he thought he'd find forever love with was an elementary school teacher wearing clothes permanently stained with finger paint. But when you're playing for keeps, sometimes you have to get a little dirty.

[American Exceptionalism in a New Era](#) Aug 11 2021 In American Exceptionalism in a New Era, editor Thomas W. Gilligan, director of the Hoover Institution, has compiled thirteen essays by Hoover fellows that discuss the unique factors that have historically set America apart from other nations and how these factors shape public policy. The authors show how America and its people have prospered and emerged as global leaders by prizing individuality and economic freedom and explore key factors in America's success, including immigration, education, divided government, light regulation, low taxes, and social mobility. America isn't perfect, they argue, but it is exceptional. Taken

together, the essays form a broad exploration of American attitudes on everything from tax rates and property rights to the role of government and rule of law. They examine the beliefs of statesmen including Alexis de Tocqueville, Abraham Lincoln, Herbert Hoover, and Ronald Reagan—each of whom considered America fundamentally different from other nations. Finally they outline the ways American exceptionalism may be in decline, with consequences both at home and abroad. At a time when "the idea of the American dream is not in high repute in our public discourse," the authors collectively argue that the United States must continue to believe in itself as exceptional and indispensable or else face a world where America no longer sets the standard. Nash, Lee Ohanian, Paul E. Peterson, Kori Schake
Cleveland Rocked Apr 19 2022 In 1995, Cleveland rocked. With Montell Jordan's "This Is How We Do It," blaring in the locker room, the Indians racked up 100 wins in a strike-shortened season and reached the World Series for the first time in 41 years. Fans were on a first-name basis with the stars that lit up the city: Omar, Manny, The Thomeinator, A.B. Cleveland Rocked is the complete story of the team that brought sellout crowds and walk-off wins to the corner of Carnegie and Ontario. Author Zack Meisel traces the roots of the pennant winner, from trading All-Star Joe Carter for Sandy Alomar and Carlos Baerga in 1989 to the campaign to build a new stadium. Meisel introduces readers to a cast of characters that larger-than-life personalities, including Belle, Thome, Kenny Lofton, Eddie Murray, and manager Mike Hargrove, who managed to keep the clubhouse at peace. Thrilling come-from-behind wins jump off the page as the Indians race toward clinching the division. Then Meisel details the Indians' October to Remember, from thrilling playoff triumphs over Boston and Seattle to the first World Series games in Cleveland since the days of Bob Feller. Cleveland Rocked offers the story of a team that brought baseball back in Northeast Ohio.

Rap Beyond Resistance Oct 21 2019 This book fills the gap in existing literature by exploring other forms of political discourses in non-Western rap music. Theoretically, it challenges and explores resistance, arguing towards the need for different epistemological frameworks in which to look at narratives of cultural resistance in the Arabic-speaking world. Empirically, it provides an in-depth look at the politics of rap culture in Morocco. Rap Beyond Resistance bridges the humanities and social sciences in order to de-Westernize cultural studies, presenting the political narratives of the Moroccan rap scene beyond secular liberal meanings of resistance. By exploring what is political, this book brings light to a vibrant and varied rap scene diverse in its political discourses—with an emphasis on patriotism and postcolonial national identity—and uncovers different ways in which young artists are being political beyond 'radical lyrics'.

Ball Cap Nation Sep 24 2022 As the country grows increasingly diverse and complicated, Americans seek, and occasionally find, a common thread to unite them. And, as Jim Lilliefors reveals in his new book, that common thread is what the baseball cap is made of -- indeed, what has transformed it into America's National Hat. As fads go, it's no longer even a fad, but a part of the national identity that, for better or worse, is a symbol of America. It feeds an illusion that Americans cherish -- that despite their differences, and no matter what position they play -- when wearing a baseball cap, they're all part of the same team. Exploring every aspect of caps and their culture -- including the history, manufacturing, and evolution of baseball caps; collecting and caring for caps; cap etiquette; and even cap urban legends -- and packed with photos throughout, Ball Cap Nation is a delightful look at a uniquely American phenomenon.

ALL CAPS Dec 15 2021 In March 2020, during the great COVID-19 lockdown, television producer Craig Colby's work disappeared. He marked the time by wearing a different baseball hat every day, posting a picture with a story about each one on social media. A community of friends started sharing their hats and stories, too. After 125 days, Craig ran out of hats, but gained new insight into what each cap told him about his own life. In isolation, Craig experienced triumph and heartbreak, love and loss. He was meeting his childhood sports heroes and floating weightless with an astronaut. The stories in ALL CAPS weave a tapestry of human connection, one hat at a time.

Thicker Than Water Jan 24 2020 Much of what you've heard about plastic pollution may be wrong. Instead of a great island of trash, the infamous Great Pacific Garbage Patch is made up of manmade debris spread over hundreds of miles of sea—more like a soup than a floating garbage dump. Recycling is more complicated than we were taught: less than nine percent of the plastic we create is reused, and the majority ends up in the ocean. And plastic pollution isn't confined to the open ocean: it's in much of the air we breathe and the food we eat. In *Thicker Than Water: The Quest for Solutions to the Plastic Crisis*, journalist Erica Cirino brings readers on a globe-hopping journey to meet the scientists and activists telling the real story of the plastic crisis. From the deck of a plastic-hunting sailboat with a disabled engine, to the labs doing cutting-edge research on microplastics and the chemicals we ingest, Cirino paints a full picture of how plastic pollution is threatening wildlife and human health. *Thicker Than Water* reveals that the plastic crisis is also a tale of environmental injustice, as poorer nations take in a larger share of the world's trash, and manufacturing chemicals threaten predominantly Black and low-income communities. There is some hope on the horizon, with new laws banning single-use items and technological innovations to replace plastic in our lives. But Cirino shows that we can only fix the problem if we face its full scope and begin to repair our throwaway culture. *Thicker Than Water* is an eloquent call to reexamine the systems churning out waves of plastic waste.

The Imagination Machine Feb 23 2020 A guide for mining the imagination to find powerful new ways to succeed. We need imagination now more than ever—to find new opportunities, rethink our businesses, and discover paths to growth. Yet too many companies have lost their ability to imagine. What is this mysterious capacity? How does imagination work? And how can organizations keep it alive and harness it in a systematic way? The Imagination Machine answers these questions and more. Drawing on the experience and insights of CEOs across several industries, as well as lessons from neuroscience, computer science, psychology, and philosophy, Martin Reeves of Boston Consulting Group's Henderson Institute and Jack Fuller, an expert in neuroscience, provide a fascinating look into the mechanics of imagination and lay out a process for creating ideas and bringing them to life: The Seduction: How to open yourself up to surprises The Idea: How to generate new ideas The Collision: How to rethink your idea based on real-world feedback The Epidemic: How to spread an evolving idea to others The New Ordinary: How to turn your novel idea into an accepted reality The Encore: How to repeat the process—again and again. Imagination is one of the least understood but most crucial ingredients of success. It's what makes the difference between an incremental change and the kinds of pivots and paradigm shifts that are essential to transformation—especially during a crisis. The Imagination Machine is the guide you need to demystify and operationalize this powerful human capacity, to inject new life into your company, and to head into unknown territory with the right tools at your disposal.

Good Citizenship in America Nov 02 2020 Good Citizenship in America describes a civic ideal of who enjoys membership in the state and what obligations that entails, and traces its history in America. Until 1865, this ideal called for virtuous political behavior (republicanism) but extended the franchise beyond early republican expectations (democracy). The book follows the widening of the franchise to women and people of color and to those with little or no property following economic development post 1865. In the twentieth century, the civic ideal was influenced by the increase of consumerism, its peak after World War II, and its subsequent decline. More recent citizenship, informed by environmental problems and growing global Darwinism, places a bigger and bigger emphasis on the 'economic conscience'. This is an easily accessible analysis of civic trends in America, and one that highlights much of what is decent in American life.

False Alarm Dec 03 2020 The New York Times-bestselling "skeptical environmentalist" argues that panic over climate change is causing more harm than good. Hurricanes batter our coasts. Wildfires rage across the American West. Glaciers collapse in the Arctic. Politicians, activists, and the media espouse a common message: climate change is destroying the planet, and we must take drastic action immediately to stop it. Children panic about their future, and adults wonder if it is even ethical to bring new life into the world. Enough, argues bestselling author Bjorn Lomborg. Climate change is real, but it's not the apocalyptic threat that we've been told it is. Projections of Earth's imminent demise are based on bad science and even worse economics. In panic, world leaders have committed to wildly expensive but largely ineffective policies that hamper growth and crowd out more pressing investments in human capital, from immunization to education. **False Alarm** will convince you that everything you think about climate change is wrong -- and points the way toward making the world a vastly better, if slightly warmer, place for us all.

The Black Fives Jul 10 2021 A groundbreaking, timely history of the largely unknown early days of Black basketball, bringing to life the trailblazing players, teams, and impresarios who made the game from the introduction of the game of basketball to Black communities on a wide scale in 1904 to the racial integration of the NBA in 1950, dozens of African American teams were founded and flourished. This period, known as the Black Fives Era (teams at the time were often called "fives"), was a time of pioneering players and managers. They battled discrimination and marginalization and created culturally rich, socially meaningful events. But despite headline-making rivalries between big-city clubs, the savvy moves of innovative businessmen, and the undeniable talent of star players, this period is almost entirely unknown to basketball fans. Claude Johnson has made it his mission to change that. An advocate fiercely committed to our history, for more than two decades Johnson has conducted interviews, mined archives, collected artifacts, and helped to preserve this historically important African American experience that otherwise would have been lost. **The Black Fives** is the result of his work, a landmark narrative history that braids together the stories of these forgotten pioneers and rewrites our understanding of the story of basketball.

Family Caps, Abortion and Women of Color Jun 16 2019 Fifteen years ago, New Jersey became the first of over twenty states to introduce the family cap, a welfare reform policy that reduces or eliminates cash benefits for unmarried women on public assistance who become pregnant. The caps have lowered extra-marital birth rates, as intended but as Michael J. Camasso shows convincingly in this provocative book, they did so in a manner that few of the policy architects are willing to acknowledge publicly, namely by increasing the abortion rate disproportionately among black and Hispanic women. In **Family Caps, Abortion, and Women of Color**, Camasso (who headed up the evaluation of the nation's first cap) presents the caps history from inception through implementation to his investigation and the dramatic attempts to squelch his unpleasant findings. The book is filled with devastatingly clear-cut evidence and hard-nosed data analyses, yet Camasso also pays close attention to the reactions his findings provoked in policymakers, both conservative and liberal, who were unprepared for the effects of their crude social engineering and did not want their success scrutinized too closely. Camasso argues that absent any successful rehabilitation or marriage strategies, abortion provides a viable third way for policymakers to help black and Hispanic women accumulate the social and human capital they need to escape welfare, while simultaneously appealing to liberals' passion for reproductive freedom and the neoconservatives' sense of social pragmatism. Camasso's conclusions will please no one along the political spectrum, making it all the more essential for them to be studied widely. A classic example of what can happen to research and the researcher when research findings become misaligned with political goals and strategies, **Family Caps, Abortion and Women of Color** is sure to foment a contentious but vital discussion among all who read it.
