***The Zealandia Drowning Debate Sep 24 2022 Did the entire New Zealand land mass sink beneath the waves 23 million years ago? Many biologists reject the idea and insist that our native terrestrial fauna can be explained only by the continuous existence of land. But many geologists are now asserting that there is no longer any convincing geological evidence that the New Zealand section of Zealandia remained above the sea's surface. *New York 2140 Oct 13 2021 New York Times bestselling author Kim Stanley Robinson returns with a bold and brilliant vision of New York City in the next century. As the sea levels rose, every street became a canal. Every skyscraper an island. For the residents of one apartment building in Madison Square, however, New York in the year 2140 is far from a drowned city. There is the market trader, who finds opportunities where others find trouble. There is the detective, whose work will never disappear -- along with the lawyers, of course. There is the internet star, beloved by millions for her airship adventures, and the building's manager, quietly respected for his attention to detail. Then there are two boys who don't live there, but have no other home -- and who are more important to its future than anyone might imagine. Lastly there are the coders, temporary residents on the roof, whose disappearance triggers a sequence of events that threatens the existence of all -- and even the long-hidden foundations on which the city rests.*

*Where the Crawdads Sing (Movie Tie-In) Feb 17 2022 NOW A MAJOR MOTION PICTURE The #1 New York Times bestselling worldwide sensation with more than 15 million copies sold, “a painfully beautiful first novel that is at once a murder mystery, a coming-of-age narrative and a celebration of nature” (The New York Times Book Review). For years, rumors of the “Marsh Girl” have haunted Barkley Cove, a quiet town on the North Carolina coast. So in late 1969, when handsome Chase Andrews is found dead, the locals immediately suspect Kya Clark, the so-called Marsh Girl. But Kya is not what they say. Sensitive and intelligent, she has survived for years alone in the marsh that she calls home, finding friends in the gulls and lessons in the sand. Then the time comes when she yearns to be touched and loved. When two young men from town become intrigued by her wild beauty, Kya opens herself to a new life—until the unthinkable happens. Where the Crawdads Sing is at once an exquisite ode to the natural world, a heartbreaking coming-of-age story, and a surprising tale of possible murder. Delia Owens reminds us that we are forever shaped by the children we once were, and that we are all subject to the beautiful and violent secrets that nature keeps.*

*Sink Sep 12 2021 A woman fights for survival against murderous clowns. A gang member has a crisis of conscience. A family move into a luxury high-rise and come to suspect they're in grave danger. And a budding romance is sorely tested by the date night from hell. Anything can happen in Sinkhill, and there are only two constants... blood and rain.*

*Sink 'Em All: Submarine Warfare in the Pacific Jan 04 2021 Sink 'Em All by Vice Admiral Charles A. Lockwood, the U.S. Navy commander of the Pacific submarine fleet during World War 2, is the exhaustive and definitive account of submarine warfare between the US and Japanese 1942-45. Lockwood's intricate narrative is the breathless story of every submarine in the US fleet, what they did during the war, their misses, near misses and hits. He takes us into the cramped quarters of mess-halls and control rooms and brings the chief actors in the grueling conflict to life.*

*The King in Yellow Mar 06 2021 Toward the end of the year 1920 the Government of the United States had practically completed the programme, adopted during the last months of President Winthrop's administration. The country was apparently tranquil. Everybody*

**knows how the Tariff and Labour questions were settled. The war with Germany, incident on that country's seizure of the Samoan Islands, had left no visible scars upon the republic, and the temporary occupation of Norfolk by the invading army had been forgotten in the joy over repeated naval victories, and the subsequent ridiculous plight of General Von Gartenlaube's forces in the State of New Jersey. The Cuban and Hawaiian investments had paid one hundred per cent and the territory of Samoa was well worth its cost as a coaling station. The country was in a superb state of defence. Every coast city had been well supplied with land fortifications; the army under the parental eye of the General Staff, organized according to the Prussian system, had been increased to 300,000 men, with a territorial reserve of a million; and six magnificent squadrons of cruisers and battle-ships patrolled the six stations of the navigable seas, leaving a steam reserve amply fitted to control home waters. The gentlemen from the West had at last been constrained to acknowledge that a college for the training of diplomats was as necessary as law schools are for the training of barristers; consequently we were no longer represented abroad by incompetent patriots. The nation was prosperous; Chicago, for a moment paralyzed after a second great fire, had risen from its ruins, white and imperial, and more beautiful than the white city which had been built for its plaything in 1893. Everywhere good architecture was replacing bad, and even in New York, a sudden craving for decency had swept away a great portion of the existing horrors. Streets had been widened, properly paved and lighted, trees had been planted, squares laid out, elevated structures demolished and underground roads built to replace them. The new government buildings and barracks were fine bits of architecture, and the long system of stone quays which completely surrounded the island had been turned into parks which proved a god-send to the population. The subsidizing of the state theatre and state opera brought its own reward. The United States National Academy of Design was much like European institutions of the same kind. Nobody envied the Secretary of Fine Arts, either his cabinet position or his portfolio. The Secretary of Forestry and Game Preservation had a much easier time, thanks to the new system of National Mounted Police. We had profited well by the latest treaties with France and England; the exclusion of foreign-born Jews as a measure of self-preservation, the settlement of the new independent negro state of Suanee, the checking of immigration, the new laws concerning naturalization, and the gradual centralization of power in the executive all contributed to national calm and prosperity. When the Government solved the Indian problem and squadrons of Indian cavalry scouts in native costume were substituted for the pitiable organizations tacked on to the tail of skeletonized regiments by a former Secretary of War, the nation drew a long sigh of relief. When, after the colossal Congress of Religions, bigotry and intolerance were laid in their graves and kindness and charity began to draw warring sects together, many thought the millennium had arrived, at least in the new world which after all is a world by itself.**

***Fevers, Feuds, and Diamonds* Aug 19 2019 “Paul Farmer brings his considerable intellect, empathy, and expertise to bear in this powerful and deeply researched account of the Ebola outbreak that struck West Africa in 2014. It is hard to imagine a more timely or important book.” —Bill and Melinda Gates “[The] history is as powerfully conveyed as it is tragic . . . Illuminating . . . Invaluable.” —Steven Johnson, *The New York Times Book Review* In 2014, Sierra Leone, Liberia, and Guinea suffered the worst epidemic of Ebola in history. The brutal virus spread rapidly through a clinical desert where basic health-care facilities were few and far between. Causing severe loss of life and economic disruption, the Ebola crisis was a major tragedy of modern medicine. But why did it happen, and what can we learn from it? Paul Farmer, the internationally renowned doctor and anthropologist, experienced the Ebola outbreak firsthand—Partners in Health, the organization he founded, was among the international responders. In *Fevers, Feuds, and Diamonds*, he offers the first substantive account of this frightening, fast-moving episode and its implications. In vibrant prose, Farmer tells the harrowing stories of Ebola victims while showing why the medical response was slow and insufficient. Rebutting misleading claims about the origins of Ebola and why it spread so rapidly, he traces West Africa’s chronic health failures back to centuries of exploitation and injustice. Under formal colonial rule, disease containment was a priority but care was not – and the region’s health care woes worsened, with devastating consequences that Farmer traces up to the present. This thorough and hopeful narrative is a definitive work of reportage, history, and advocacy, and a crucial intervention in public-health discussions around the world.**

No one could fathom how a vessel equipped with satellite communications, a sophisticated**

*navigation system, and cutting-edge weather forecasting could suddenly vanish—until now. Relying on hundreds of exclusive interviews with family members and maritime experts, as well as the words of the crew members themselves—whose conversations were captured by the ship's data recorder—journalist Rachel Slade unravels the mystery of the sinking of El Faro. As she recounts the final twenty-four hours onboard, Slade vividly depicts the officers' anguish and fear as they struggled to carry out Captain Michael Davidson's increasingly bizarre commands, which, they knew, would steer them straight into the eye of the storm. Taking a hard look at America's aging merchant marine fleet, Slade also reveals the truth about modern shipping—a cut-throat industry plagued by razor-thin profits and ever more violent hurricanes fueled by global warming. A richly reported account of a singular tragedy, Into the Raging Sea takes us into the heart of an age-old American industry, casting new light on the hardworking men and women who paid the ultimate price in the name of profit.*

***Sinkable Jul 18 2019 From the national bestselling author of The Food Explorer, a fascinating and rollicking plunge into the story of the world's most famous shipwreck, the RMS Titanic On a frigid April night in 1912, the world's largest—and soon most famous—ocean liner struck an iceberg and slipped beneath the waves. She had scarcely disappeared before her new journey began, a seemingly limitless odyssey through the world's fixation with her every tragic detail. Plans to find and raise the Titanic began almost immediately. Yet seven decades passed before it was found. Why? And of some three million shipwrecks that litter the ocean floor, why is the world still so fascinated with this one? In Sinkable, Daniel Stone spins a fascinating tale of history, science, and obsession, uncovering the untold story of the Titanic not as a ship but as a shipwreck. He explores generations of eccentrics, like American Charles Smith, whose 1914 recovery plan using a synchronized armada of ships bearing electromagnets was complex, convincing, and utterly impossible; Jack Grimm, a Texas oil magnate who fruitlessly dropped a fortune to find the wreck after failing to find Noah's Ark; and the British Doug Woolley, a former pantyhose factory worker who has claimed, since the 1960s, to be the true owner of the Titanic wreckage. Along the way, Sinkable takes readers through the two miles of ocean water in which the Titanic sank, showing how the ship broke apart and why, and delves into the odd history of our understanding of such depths. Author Daniel Stone studies the landscape of the seabed, which in the Titanic's day was thought to be as smooth and featureless as a bathtub. He interviews scientists to understand the decades of rust and decomposition that are slowly but surely consuming the ship. (It is expected to disappear entirely within a few decades!) He even journeys over the Atlantic, during a global pandemic, to track down the elusive Doug Woolley. And Stone turns inward, looking at his own dark obsession with both the Titanic and shipwrecks in general, and why he spends hours watching ships sink on YouTube. Brimming with humor, curiosity and wit, Sinkable follows in the tradition of Susan Orlean and Bill Bryson, offering up a page-turning work of personal journalism and an immensely entertaining romp through the deep sea and the nature of obsession.***

***Twenty Thousand Leagues Under the Sea Jul 10 2021 The year 1866 was signalled by a remarkable incident, a mysterious and puzzling phenomenon, which doubtless no one has yet forgotten. Not to mention rumours which agitated the maritime population and excited the public mind, even in the interior of continents, seafaring men were***

**particularly excited. Merchants, common sailors, captains of vessels, skippers, both of Europe and America, naval officers of all countries, and the Governments of several States on the two continents, were deeply interested in the matter. For some time past vessels had been met by "an enormous thing," a long object, spindle-shaped, occasionally phosphorescent, and infinitely larger and more rapid in its movements than a whale. The facts relating to this apparition (entered in various log-books) agreed in most respects as to the shape of the object or creature in question, the untiring rapidity of its movements, its surprising power of locomotion, and the peculiar life with which it seemed endowed. If it was a whale, it surpassed in size all those hitherto classified in science. Taking into consideration the mean of observations made at divers times—rejecting the timid estimate of those who assigned to this object a length of two hundred feet, equally with the exaggerated opinions which set it down as a mile in width and three in length—we might fairly conclude that this mysterious being surpassed greatly all dimensions admitted by the learned ones of the day, if it existed at all. And that it DID exist was an undeniable fact; and, with that tendency which disposes the human mind in favour of the marvellous, we can understand the excitement produced in the entire world by this supernatural apparition. As to classing it in the list of fables, the idea was out of the question. On the 20th of July, 1866, the steamer Governor Higginson, of the Calcutta and Burnach Steam Navigation Company, had met this moving mass five miles off the east coast of Australia. Captain Baker thought at first that he was in the presence of an unknown sandbank; he even prepared to determine its exact position when two columns of water, projected by the mysterious object, shot with a hissing noise a hundred and fifty feet up into the air. Now, unless the sandbank had been submitted to the intermittent eruption of a geyser, the Governor Higginson had to do neither more nor less than with an aquatic mammal, unknown till then, which threw up from its blow-holes columns of water mixed with air and vapour. Similar facts were observed on the 23rd of July in the same year, in the Pacific Ocean, by the Columbus, of the West India and Pacific Steam Navigation Company. But this extraordinary creature could transport itself from one place to another with surprising velocity; as, in an interval of three days, the Governor Higginson and the Columbus had observed it at two different points of the chart, separated by a distance of more than seven hundred nautical leagues.**

**The Unforgettable Logan Foster #1 Apr 07 2021 Packed with superheroes, supervillains, and epic showdowns between good and evil, The Unforgettable Logan Foster from debut author Shawn Peter shows that sometimes being a hero is just about being yourself. Logan Foster has pretty much given up on the idea of ever being adopted. It could have something to do with his awkward manner, his photographic memory, or his affection for reciting curious facts, but whatever the cause, Logan and his "PP's" (prospective parents) have never clicked. Then everything changes when Gil and Margie**

But it doesn't take Logan long to notice some very odd things about them. They are out at all hours, they never seem to eat, and there's a part of the house that is protected by some pretty elaborate security. No matter what Logan could have imagined, nothing prepared him for the truth: His PP's are actually superheroes, and they're being hunted down by dastardly forces. Logan's found himself caught in the middle in a massive battle and the very fate of the world may hang in the balance. Will Logan be able to find a way to save the day and his new family?**

**Will the Boat Sink the Water? Jul 22 2022 The Chinese economic miracle is happening despite, not because of, China's 900 million peasants. They are missing from the portraits of booming Shanghai, or Beijing. Many of China's underclass live under a feudalistic system unchanged since the fifteenth century. They are truly the voiceless in modern China. They are also, perhaps, the reason that China will not be able to make the great social and economic leap forward, because if it is to leap it must carry the 900 million with it. Chinese journalists Wu Chuntao and Chen Guidi returned to Wu's home province of Anhui, one of China's poorest, to undertake a three-year survey of what had happened to the peasants there, asking the question: Have the peasants been betrayed by the revolution undertaken in their name by Mao and his successors? The result is a brilliant narrative of life among the 900 million, and a vivid portrait of the petty dictators that run China's villages and counties and the consequences of their bullying despotism on the people they administer. Told principally through four dramatic narratives of particular Anhui people, Will the Boat Sink the Water? gives voice to the unheard masses and looks beneath the gloss of the new China to find the truth of daily life for its vast population of rural poor.**

A powerful, luminous story of coming of age at the end of the 1950s, it is the story of a mother's love and a father's fears, of growing up and getting out. With the grace of a natural storyteller, Homer Hickam looks back after a distinguished NASA career to tell his own true story of growing up in a dying coal town and of how, against the odds, he made his dreams of launching rockets into outer space come true. A story of romance and loss and a keen portrait of life at an extraordinary point in American history, Rocket Boys is a chronicle of triumph.***

**fig tree stretches through a cavity in the roof, and this tree bears witness to their hushed, happy meetings and eventually, to their silent, surreptitious departures. The tree is there when war breaks out, when the capital is reduced to ashes and rubble, and when the teenagers vanish. Decades later, Kostas returns. He is a botanist looking for native species, but really, he's searching for lost love. Years later a *Ficus carica* grows in the back garden of a house in London where Ada Kazantzakis lives. This tree is her only connection to an island she has never visited--- her only connection to her family's troubled history and her complex identity as she seeks to untangle years of secrets to find her place in the world. ***Hidden Valley Road* Feb 23 2020 #1 NEW YORK TIMES BESTSELLER • OPRAH'S BOOK CLUB PICK • ONE OF GQ's TOP 50 BOOKS OF LITERARY JOURNALISM IN THE 21st CENTURY • The heartrending story of a midcentury American family with twelve children, six of them diagnosed with schizophrenia, that became science's great hope in the quest to understand the disease. "Reads like a medical detective journey and sheds light on a topic so many of us face: mental illness." —Oprah Winfrey Don and Mimi Galvin seemed to be living the American dream. After World War II, Don's work with the Air Force brought them to Colorado, where their twelve children perfectly spanned the baby boom: the oldest born in 1945, the youngest in 1965. In those years, there was an established script for a family like the Galvins--aspiration, hard work, upward mobility, domestic harmony--and they worked hard to play their parts. But behind the scenes was a different story: psychological breakdown, sudden shocking violence, hidden abuse.**

***By the mid-1970s, six of the ten Galvin boys, one after another, were diagnosed as schizophrenic. How could all this happen to one family? What took place inside the house on Hidden Valley Road was so extraordinary that the Galvins became one of the first families to be studied by the National Institute of Mental Health. Their story offers a shadow history of the science of schizophrenia, from the era of institutionalization, lobotomy, and the schizophrenogenic mother to the search for genetic markers for the disease, always amid profound disagreements about the nature of the illness itself. And unbeknownst to the Galvins, samples of their DNA informed decades of genetic research that continues today, offering paths to treatment, prediction, and even eradication of the disease for future generations. With clarity and compassion, bestselling and award-winning author Robert Kolker uncovers one family's unforgettable legacy of suffering, love, and hope.***
