The Oxidation of Oxygen and Related Chemistry Aug 09 2020 The selected papers in this invaluable volume are arranged in chapters, each with an introductory essay. The purpose of the arrangement is to illustrate the process of scientific discovery at work. Neil Bartlett's field is that of powerful oxidizers. The early chapters tell the story of the oxidation of the oxygen molecule and the discovery of xenon chemistry. His work in noble-gas chemistry is summarized. Succeeding chapters show how metastable fluorides such as AgF<sub>3</sub> and NiF<sub>4</sub> came to be prepared at ordinary temperatures and pressures, and how they have provided the most potent oxidizers and fluorinators ever prepared. Contents: The Discovery of O<sub>2</sub> PtF<sub>6</sub> and some O + 2 Chemistry; XePtF<sub>6</sub> and other Xenon Chemistry; The Xenon Fluorides and Their Complexes; The Xenon Fluorosulfates and Related Compounds; Oxidation-State Limits, and Range in the Noble-Metal Fluorides; Structural Features of Binary Transition-Element Fluorides; Thermodynamically Unstable Transition-Element Fluorides; Chemistry in Liquid Anhydrous Hydrogen Fluoride (aHF); Some Thermodynamic Considerations; Graphite

**Intercalation and Evidence for a Thermodynamic Barrier. Readership: Chemists and inorganic chemists.**

***Latin America: Its Future in the Global Economy* May 06 2020** Latin America: Its Future in the Global Economy is a timely contribution to the effort to meet the complex challenges entailed in Latin America's increasing participation in world markets. Taking into account the recent changes in the region and a future WTO conference, twelve economists and two international trade lawyers provide a framework for the analysis of trade negotiations by identifying key points of disagreement among trading partners, and discuss controversial issues such as the environment, labour and agriculture, exceptional protection, investment, services, e-commerce and the efficiency of the dispute settlement mechanism. The contributors identify the optimum approach for Latin America to take in protecting its interests and enhancing its advantages in global trade, and assess the various tools that negotiators might use during the forthcoming round of multilateral negotiations. They make concrete recommendations concerning trade strategy, policy, implementation and management together with suggestions as to how Latin America and other developing countries can increase their bargaining power in order to deal with new circumstances as they arise.

**Encyclopedia of Television Shows, 1925 through 2010, 2d ed.** Dec 13 2020 This fully updated and expanded edition covers over 10,200 programs, making it the most comprehensive documentation of television programs ever published. In addition to covering the standard network and cable entertainment genres, the book also covers programs generally not covered elsewhere in print (or even online), including Internet series, aired and unaired pilot films, erotic series, gay and lesbian series, risqué cartoons and experimental programs from 1925 through 1945.

**Organofluorine Chemistry** Dec 25 2021 During the past fifteen years commercial interest in compounds containing carbon fluorine bonds has burgeoned beyond all expectations, mainly owing to business opportunities arising from work on biologically active fluoroorganics- particularly agrochemicals, the relentless search for new markets for fluoropolymers and fluoro carbon fluids, developments in the field of medical diagnostics, and the drive to find replacements for ozone-depleting CFCs and Halon fire-extinguishing agents. Judging the situation to warrant the publication of a comprehensive collection of up-to-date reviews dealing with commercial organofluorine compounds within a single volume of manageable size (and hence reasonable cost), we were delighted to be invited by Plenum Publishing Corporation to produce a suitable book. In order to provide an authentic and wide-ranging account of current commercial applications of fluoroorganic materials, it clearly was necessary to assemble a sizeable team of knowledgeable contributing authors selected almost entirely from industry. Through their efforts we have been able to produce an almost complete coverage of the modern organofluorochemicals business in a manner designed to attract a reader ship ranging from experts in the field, through chemists and technologists currently unaware of the extent of industrial involvement with fluoroorganics, to students of applied chemistry. Promised chapters dedicated to perfluoroolefin oxides and <sup>18</sup>F labeling of radiopharmaceuticals failed to

materialize. This is somewhat unfortunate in view of our aim to achieve comprehensive coverage of the subject.

**Cognitive Aging Aug 21 2021** For most Americans, staying "mentally sharp" as they age is a very high priority. Declines in memory and decision-making abilities may trigger fears of Alzheimer's disease or other neurodegenerative diseases. However, cognitive aging is a natural process that can have both positive and negative effects on cognitive function in older adults - effects that vary widely among individuals. At this point in time, when the older population is rapidly growing in the United States and across the globe, it is important to examine what is known about cognitive aging and to identify and promote actions that individuals, organizations, communities, and society can take to help older adults maintain and improve their cognitive health. Cognitive Aging assesses the public health dimensions of cognitive aging with an emphasis on definitions and terminology, epidemiology and surveillance, prevention and intervention, education of health professionals, and public awareness and education. This report makes specific recommendations for individuals to reduce the risks of cognitive decline with aging. Aging is inevitable, but there are actions that can be taken by individuals, families, communities, and society that may help to prevent or ameliorate the impact of aging on the brain, understand more about its impact, and help older adults live more fully and independent lives. Cognitive aging is not just an individual or a family or a health care system challenge. It is an issue that affects the fabric of society and requires actions by many and varied stakeholders. Cognitive Aging offers clear steps that individuals, families, communities, health care providers and systems, financial organizations, community groups, public health agencies, and others can take to promote cognitive health and to help older adults live fuller and more independent lives. Ultimately, this report calls for a societal commitment to cognitive aging as a public health issue that requires prompt action across many sectors.

**Fluorinated Surfactants and Repellents, Second Edition, Jan 14 2021** A discussion of the synthesis, problems, theories and applications of fluorinated surfactants, this second edition is updated with four new chapters on repellency and protection against soiling and staining and over 2900 references, equations, and drawings (800 more than the previous edition). It lists alphabetically and explores numerous applications of fluorinated surfactants. Called "...a most useful introduction to these fascinating materials" by the Journal of Dispersion Science and Technology and "...a coherent and stimulating handbook...the most useful book in the fluorinated surfactants field to date. Recommended." by the Journal of the Chemical Society, Faraday Transactions - this book is a source of factual data, methods of manufacture, and chemical structures for the surfactant scientist and user.

**Information Systems Development Oct 23 2021** Information Systems Development (ISD) progresses rapidly, continually creating new challenges for the professionals involved. New concepts, approaches and techniques of systems development emerge constantly in this field. Progress in ISD comes from research as well as from practice. This conference will discuss

issues pertaining to information systems development (ISD) in the inter-networked digital economy. Participants will include researchers, both experienced and novice, from industry and academia, as well as students and practitioners. Themes will include methods and approaches for ISD; ISD education; philosophical, ethical, and sociological aspects of ISD; as well as specialized tracks such as: distributed software development, ISD and knowledge management, ISD and electronic business / electronic government, ISD in public sector organizations, IOS.

***Fluorine Chemistry at the Millennium*** Jul 08 2020 This volume brings together contributions by leading researchers covering a wide scope so characteristic of fluorine chemistry. It is a monograph of historical character comprising personalized accounts of progress and events in areas of particular interest. There is also much to interest and instruct chemists from other disciplines as a good proportion of the chapters contain a considerable amount of 'hard' referenced information relating to modern organic, organoelemental and inorganic chemistry. Historians of chemistry and technology will no doubt be tempted to dip into this book, and surely whoever addresses the task of commemorating Moissan's achievement at the 150-years stage will bless us all in some measure for its existence.

***Managing and Using Information Systems*** Jun 30 2022 **Managing & Using Information Systems: A Strategic Approach** provides a solid knowledgebase of basic concepts to help readers become informed, competent participants in Information Systems (IS) decisions. Written for MBA students and general business managers alike, the text explains the fundamental principles and practices required to use and manage information, and illustrates how information systems can create, or obstruct, opportunities within various organizations. This revised and updated seventh edition discusses the business and design processes relevant to IS, and presents a basic framework to connect business strategy, IS strategy, and organizational strategy. Readers are guided through each essential aspect of information Systems, including information architecture and infrastructure, IT security, the business of Information Technology, IS sourcing, project management, business analytics, and relevant IS governance and ethical issues. Detailed chapters contain mini cases, full-length case studies, discussion topics, review questions, supplemental reading links, and a set of managerial concerns related to the topic.

**Mordecai Richler** Oct 11 2020 Based on never-before published material from the Richler archives as well as interviews with family members, friends, and acquaintances, **Mordecai Richler: Leaving St Urbain** shows how Richler consistently mined his remarkable life for material for his novels. Beginning with the early clashes with his grandfather over Orthodox Judaism, and exposing the reasons behind his life-long quarrel with his mother, Kramer follows Richler as he flees to Ibiza and Paris, where he counted himself as one of the avant-garde who ushered in the 1960s. His successes abroad gave him the opportunity to remain in England and leave novel-writing behind — but he did neither. More than a biography, **Mordecai Richler: Leaving St Urbain** is the story of a Jewish culture finding its place within a larger stream, a literary culture moving into the colloquial, and a Canada torn between nationalism and cosmopolitanism.

***Antisemitism in Canada* Nov 04 2022** This book is the first collection of scholarly essays to treat the topic of antisemitism in Canada, a complete history of which has yet to be written. Eleven leading thinkers in the field examine antisemitism in Canada, from the colonial era to the present day, in essays which reflect the saga of the nation itself. The history of the Jewish community, its struggles and its fortunes is mirrored in the wider history of Canada, from Confederation to the present. The contributors cast light on Canadian antisemitism through a thorough examination of old and new tensions, including Anglo-French, east-west and Jewish-Ukrainian relations. Attitudes to Jews in pre-Confederation Canada, French Canada from Confederation to World War I as well as the interwar years, and in twentieth-century Ontario and Alberta from 1880-1950 are illustrated in various chapters. Of particular interest are the examinations of such well-known figures as Goldwin Smith, the greatly admired liberal historian of Victorian Canada, Adrien Arcand, the would-be Führer from Quebec, and James Keegstra and Ernst Züdel, of more recent notoriety. Analyses are also provided of Nazism and Canadian Protestantism and Jewish-Ukrainian relations since World War II. This is a complex and contentious subject; yet, to understand the ideas and forces that have sought to undermine the Jewish presence in Canada is to understand the dangers that threaten any democratic society, and thereby to guard against them. This compelling collection of essays offers intelligent, readable accounts of an area of Canadian history about which we know too little.

**Knowledge Management in Organizations Apr 16 2021** This book contains the refereed proceedings of the 10th International Conference on Knowledge Management in Organizations, KMO 2015, held in Maribor, Slovenia, in August 2015. The theme of the conference was "Knowledge Management and Internet of Things." The KMO conference brings together researchers and developers from industry and academia to discuss how knowledge management using big data can improve innovation and competitiveness. The 59 contributions accepted for KMO 2015 were selected from 163 submissions and are organized in topical sections on: knowledge management processes, successful knowledge sharing and knowledge management practices, innovations for competitiveness, knowledge management platforms and tools, social networks and mining techniques, knowledge management and the Internet of Things, knowledge management in health care, and knowledge management in education and research.
