A User's Guide to Neglectful Parenting Dec 31 2019 Meditations on fatherhood from the author of Jerusalem: Chronicles from the Holy City With A User's Guide to Neglectful Parenting, the trademark dry humor that pervades Guy Delisle's landmark and praised graphic travelogues takes center stage. Quick, light vignettes play on the worries and cares any young parent might have, and offer wry solutions to the petty frustrations of being a dad who works from home. Readers familiar with Delisle's stranger-in-a-strange-land technique for storytelling (employed in Jerusalem, Pyongyang, Burma Chronicles, and Shenzhen) will recognize the titular parent in this book; Delisle's travelogues were simultaneously portraits of complex places and times, and portraits of a stay-at-home dad's ever-changing relationship with his children while his wife is out working for Doctors Without Borders. The relationship between young child and all-too-irony-aware parent is beautifully done here, and Delisle's loose flowing style has been set free, creating a wonderful sense of motion throughout. A User's Guide to Neglectful Parenting is an intimate, offbeat look at the joys of parenting. A User's Guide to Neglectful Parenting has been translated from the French by Helge Dascher. Dascher has been translating graphic novels from French and German to English for over twenty years. A contributor to Drawn &

Quarterly since the early days, her translations include acclaimed titles such as the Aya series by Marguerite Abouet and Clément Oubrerie, Hostage by Guy Delisle, and Beautiful Darkness by Fabien Vehlmann and Kerascoët. With a background in art history and history, she also translates books and exhibitions for museums in North America and Europe. She lives in Montreal.

This book provides clear guidance on best practice in this area, with practical advice based on experience in countries around the world. Handbook of Service User Involvement in Mental Health Research describes the background and principles underlying the concept of service user involvement in mental health research; it provides relevant practical advice on how to engage with service users and how to build and maintain research collaboration on a professional level. The book highlights common practical problems in service user involvement, suggesting ways to avoid pitfalls and common difficulties. Combines the theoretical aspects of service user involvement in research with specific examples, as well as with general practical guidelines Represents the views of service users, in a powerful combination with the views of other mental health professionals Considers the different perspectives and needs of the stakeholders concerned Includes a step by step guide on best practice in successful service user involvement. Handbook of Service User Involvement in Mental Health Research is written for psychiatrists and other medical professionals managing people with psychiatric disorders, as well as for researchers in the mental health field who want to develop projects with service user involvement. Registries for Evaluating Patient Outcomes
Jul 30 2022 This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.
