[Real Materialism](#) Aug 13 2021 Real Materialism draws together papers written over twenty years by Galen Strawson in philosophy of mind and metaphysics. Strawson focuses on five main areas of enquiry: [1] the nature of the physical, consciousness, the 'mind-body problem', and the prospects for panpsychism; [2] the self, the subject of experience, self-consciousness, and the 'narrative' self; [3] free will and moral responsibility; [4] the nature of thought and intentionality and their connection with consciousness; [5] the problem of causation with particular reference to the philosophy of David Hume.

Corporate Responsibility Jun 11 2021 The decision to engage in corporate social action (CSA), and the debates regarding its costs, benefits and implications to corporate performance represent a demanding issue for scholars and managers. Research is inconclusive regarding the causal relations between CSA, corporate social performance (CSP) and corporate financial performance (CFP), despite numerous empirical and theoretical studies devoted to the issue. This book presents an in-depth study of corporate social action and the factors influencing a decision to engage in it. Going beyond the causal relationship between CSA and firm performance, the book stresses the link between CSA and a firm's core managerial policies and practices, reflecting the complexity and varied facets of CSA and the numerous internal and external factors that influence its outcomes. The book draws on the experiences of various industrial sectors to reveal the importance of a range of issues such as top management pay dispersion and ownership structure, which may influence the firm's decision to engage in CSA. It also explores some of the external influences on firms, such as institutional norms, the geopolitical environment and the industrial sector. The first part of the book provides an overview of the thematic issues of CSA and performance. The second part presents a series of empirical studies that examine factors and determinants of CSA. The third part presents case studies to illustrate the processes and outcomes of CSA policy and strategy in environmentally hazardous industries.

Conference Papers Mar 08 2021 Selected papers from the annual meeting of the Conference.

Secondary Sources in Academic Papers. The Perspective of Business Ethics Dec 17 2021 Seminar paper from the year 2016 in the subject Business economics - Business Ethics, Corporate Ethics, grade: 1,7, Leuphana Universität Lüneburg, language: English, abstract: The aim of this essay is to analyze to what extend quotations in academic articles and/or monographs that solely exist out of secondary and not primary sources are problematic from the perspective of academic ethics in general and business ethics in particular. Despite being an accepted tool in academic writing and research, the excessive use of secondary sources resembles the exploitation of foreign efforts in the procurement and analysis of primary sources. The research method of this essay is based on an extensive literature research to work out central aspects of academic ethics being relevant for the creation of academic articles and monographs as products of scientific communities. Furthermore, different philosophical approaches are consulted to gain a comprehensive understanding of the business ethics approach and its fundamental pillars. The analysis comes to the conclusion, that citations solely from secondary sources and in the absence of a comprehensive confrontation with primary literature harm central values introduced by the European University Institute as the cornerstones of integrity and good scientific practice. From a business ethics point of view, the conduct violates rules of proportion and endangers the beneficence of (scientific) communities as it represents an act of selfishness to the own self-interest.

Facets of Corporate Governance and Corporate Social Responsibility in India Jun 30 2020 This book focuses on the legal and social aspects of corporate governance through doctrinal and empirical research papers presented at the 9th International Conference on Governance Fraud Ethics and Social Responsibility held at National Law University Delhi in 2018. The papers encompass the internal and external factors that affect the interests of a company's stakeholders, including shareholders, customers, suppliers, government regulators and management, and several other important players. The book provides better clarity on the concept of corporate governance and how it is intertwined with factors such as sustainability, social responsibility and the role of government, taxation and audit, and shareholder engagement.

The Federalist Papers May 30 2020 Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

[The Goals of Sustainable Development Aug 01 2020](#) This book analyses various aspects of social responsibility, corporate responsibility, sustainability and governance. Rather than focusing narrowly on a single perspective, it investigates a number of problems and scenarios that can all be considered an aspect of one of these fields, and shows how they are all related to each other and to the problems and issues facing businesses. This approach is based on the tradition of the Social Responsibility Research Network, which in its 15-year history has sought to broaden the discourse and to treat all research in these areas as inter-related and relevant to business. The book collects the best papers presented at the 15th International Conference on Corporate Social Responsibility and 6th Organisational Governance Conference held in Melbourne, Australia in September 2016.

[Taking Responsibility for Children Aug 21 2019](#) What do we as a society, and as parents in particular, owe to our children? Each chapter in Taking Responsibility for Children offers part of an answer to that question. Although they vary in the approaches they take and the conclusions they draw, each contributor explores some aspect of the moral obligations owed to children by their caregivers. Some focus primarily on the responsibilities of parents, while others focus on the responsibilities of society and government. The essays reflect a mix of concern with the practical and the philosophical aspects of taking responsibility for children, addressing such topics as parental obligations, the rights and entitlements of children, the responsibility of the state, the role and nature of public education in a liberal society, the best ways to ensure adequate child protection, the licensing of parents, children's religious education, and children's health. Taking Responsibility for Children will be of interest to philosophers, advocates for children's interests, and those interested in public policy, especially as it relates to children and families.

[Technology and Responsibility Jul 24 2022](#) Since it may seem strange for a new series to begin with volume 3, a word of explanation is in order. The series, Philosophy and Technology, inaugurated in this form with this volume, is the official publication of the Society for Philosophy & Technology. Approximately one volume each year is to be published, alternating between proceedings volumes - taken from contributions to biennial international conferences of the Society - and miscellaneous volumes, with roughly the character of a professional society journal. The forerunners of the series in its present form were two proceedings volumes: Philosophy and Technology (1983), edited by Paul T. Durbin and Friedrich Rapp, and Philosophy and Technology //: Information Technology and Computers in Theory and Practice (1986), edited by Carl Mitcham and Alois Huning - both published (as volumes 80 and 90, respectively) in the series, Boston Studies in the Philosophy of Science. The Society for Philosophy & Technology, now more than ten years old, is devoted to the promotion of philosophical scholarship that deals in one way or another with technology and technological society. "Philosophical scholarship" is interpreted broadly as including contributions from any and all perspectives; the one requirement is that the scholarship be sound, and all contributions to the series are subject to rigorous blind refereeing. "Technology," the other half of the philosophy-and-technology pairing, is also construed broadly.

[Oxford Studies in Agency and Responsibility Feb 25 2020](#) Oxford Studies in Agency and Responsibility is a series of volumes presenting outstanding new work on a set of connected themes, investigating such questions as: · What does it mean to be an agent? · What is the nature of moral responsibility? Of criminal responsibility? What is the relation between moral and criminal responsibility (if any)? · What is the relation between responsibility and the metaphysical issues of determinism and free will? · What do various psychological disorders tell us about agency and responsibility? · How do moral agents develop? How does this developmental story bear on questions about the nature of moral judgment and responsibility? · What do the results from neuroscience imply (if anything) for our questions about agency and responsibility? OSAR thus straddles the areas of moral philosophy and philosophy of action, but also draws from a diverse range of cross-disciplinary sources, including moral psychology, psychology proper (including experimental and developmental), philosophy of psychology, philosophy of law, legal theory, metaphysics, neuroscience, neuroethics, political philosophy, and more. It is unified by its focus on who we are as deliberators and (inter)actors, embodied practical agents negotiating (sometimes unsuccessfully) a world of moral and legal norms.

[State-of-the-Art Theories and Empirical Evidence May 10 2021](#) This book discusses several important issues related to corporate governance reporting, corporate social responsibility (CSR), fraud and bankruptcy. It gathers papers presented at the 6th International Conference on Governance, Fraud, Ethics and Social Responsibility, which was held in Penang, Malaysia on 18–19 November 2015. The content is divided into three major sub-themes: Corporate Governance and Accountability; Corporate Social Responsibility (CSR) and Sustainable Development; and Ethics, Risk and Fraud. The first sub-theme addresses recently identified issues, such as corporate governance reporting, corporate governance regulation differences between countries, governance and financial market economics, financial market supervision, and control and risk management. In turn, the second sub-theme focuses on international auditing standards, green/socially responsible investment, environmental and social accounting and auditing, CSR-related matters, legislation and CSR reporting differences for public listed companies, accounting for sustainable development performance, and sustainability assessment models. The third sub-theme puts the spotlight on financial assessment and diagnosis, modeling, hedging, fraud, bankruptcy, accounting and auditing ethics and ethical problems in financial markets. Taken together, the issues discussed here provide state of art theories and empirical evidence approached from broad perspectives, making the book a valuable resource for researchers, students and practitioners alike.

[Evaluating Sustainable Development and Corporate Social Responsibility Projects Mar 28 2020](#) This book discusses sustainable development decision-making. Focusing on decisions to invest in wind turbine technology as part of a corporation's CO2 emission reduction strategy, it presents a new evaluation framework, based on the triple bottom line framework widely used by businesses to communicate their adherence to corporate social responsibility. This new framework allows the evaluation of strategic corporate decisions to invest in wind turbines to mitigate global warming in the context of a corporation's social responsibility, and includes an objective measurement stage to add rigor to the evaluation process. The book describes the use of measured data from wind turbine projects to both develop and validate the methodology, and also identifies key enablers and barriers as businesses attempt to successfully integrate corporate social responsibility into their overall business strategy. Given its scope, the book appeals to postgraduate students, researchers, and business professionals interested in the environmental impact of corporations. Featuring case studies from Ireland, it is particularly relevant to audiences within Europe.

[Promoting Research Integrity in a Global Environment Feb 07 2021](#) The World Conferences on Research Integrity provide a forum for an international group of researchers, research administrators from funding agencies and similar bodies. The second such conference, held in Singapore in July 2010. This volume brings together a selection of presentations and key guidelines and statements emerging from the Conference.

[Winning The Game Scientists Play Oct 03 2020](#) In this inspiring book of personal insight and sound advice, veteran scientist Carl J. Sindermann gives an insider's look at the competitive world of science and reveals the best strategies for attaining prominence and success. Taking apart the many different roles scientists must play during their careers, Sindermann compares common mistakes scientists make with what the best strategists do-whether they are publishing papers, presenting data, chairing meetings, or coping with government or academic bureaucracy. In the end, he maintains, well-honed interpersonal skills, a savvy eye on one's competitors, and excellent science are the keys to a satisfying and successful career.
